Turnitin - Similarity Checking and AI Writing Detection

Dear Academic Staff,

The University has subscribed to Turnitin, which supports similarity checking, online grading and AI writing detection.

1. The **Similarity Check** compares student submissions against a wide range of academic sources and generates a report highlighting matched text, sources and a similarity percentage to assist in identifying potential plagiarism.

✓ [File requirements for accepting submission in Turnitin](#)

2. Turnitin enables **Online Grading** and feedback, allowing lecturers to add comments, annotations and assessment criteria, as well as assign marks directly within submissions.

3. The **AI Writing Detection** feature indicates the proportion of text that may have been generated by AI tools; scores below 20% will be marked with an asterisk (*) to indicate lower reliability.
