1.0 Dean's Welcome Message

Welcome to the Faculty of Information and Communication Technology (FICT) at Universiti Tunku Abdul Rahman (UTAR).

Information and Communication Technology, or better known as ICT, has become part of our life. From computers, phones, smart devices, to the directories of shopping malls; from work, study, entertainment, to social networking, ICT is just everywhere servicing every one of us every day. The ICT systems, applications and services are designed, created and supported by specialists who are entitled Computer Scientists, System Designers, Software Developers, Network Analysts, Computer Engineers, etc. They are real creators enabling the physical and digital worlds to be connected for the ultimate benefit of human being as a whole.

Being one of the pioneer faculties at UTAR, FICT was established in August 2002. Since then we have strived to provide our students with high quality education in order to equip them with advanced skills and knowledge to practice as innovative ICT professionals. We adopt student-centered learning approaches, highlight hands-on experience, and encourage life-long learning. In addition, we are also committed to research and development for discovering new knowledge and developing creative solutions, with one of the aims being to build the nation's strength.

Currently the Faculty offers seven undergraduate degree programmes, namely:

- Bachelor of Computer Science (Honours)

<https://fict.utar.edu.my/Dean%27s-Welcome-Message.php>

- Bachelor of Information Systems (Honours) Business Information Systems
- Bachelor of Information Systems (Honours) Information Systems Engineering
- Bachelor of Information Technology (Honours) Communications and Networking
- Bachelor of Information Technology (Honours) Computer Engineering
- Bachelor of Information Systems (Honours) Digital Economy Technology ^{New}
- Bachelor of Information Technology (Honours) Industrial Intelligent Systems ^{New}

In addition, we also offer the following postgraduate programmes:

- Master of Computer Science
- Doctor of Philosophy (Computer Science)
- Master in Data Management and Analytics
- Postgraduate Diploma in Data Management and Analytics

While browsing through our website, should you have any inquiry or like to learn more about the Faculty, we are very happy to provide you with further information to address your questions and interests.

Professor Ts. Dr. Liew Soun Yue (Dean)
Faculty of Information and Communication Technology

2.0 The History of FICT

Faculty of Information and Communication Technology (FICT) was established in May 2002 and was one of the pioneer faculties of Universiti Tunku Abdul Rahman. FICT started with Three (3) honors degree programmes namely Bachelor of Computer Science (Honours), Bachelor of Information Systems (Honours) Business Information Systems and Bachelor of Information Systems (Honours) Information Systems Engineering in May 2002.

In 10th June of the same year, the Faculty had its first cohort intake of 60 students that comprises of 24 students for Bachelor of Computer Science (Honours) degree programme, 18 students for Bachelor of Information Systems (Honours) Information Systems Engineering degree programme and 18 students for Bachelor of Information Systems (Honours) Business Information Systems degree programme. It is part of the study requirements for the students to do their internship during their course of study at FICT. Therefore, FICT sent out the first batch of interns in the year 2003 consisting of 290 students pursuing Bachelor of Information Systems (Honours) Information Systems Engineering degree programme and 295 students pursuing Bachelor of Information Systems (Honours) Business Information Systems degree programme.

In January 2005, FICT added another programme Bachelor of Information Technology (Honours) Computer Engineering to its existing programmes. Bachelor of Information Technology (Honours) Computer Engineering had an enrollment of 11 students for its first batch of students. A year later, in Jan 2006, FICT introduced the programme Bachelor of Information Technology (Honours) Communications and Networking with an intake of 6 students.

During 2008, the faculty's undergraduate programmes undergo a shifting process to the new Perak campus in Kampar, Perak, where it was placed under the Faculty of Science, Engineering and Technology (FSET). The first batch of students at FSET was made up of 21 students for Bachelor of Computer Science (Honours) degree programme, 15 students for Bachelor of Information Systems (Honours) Information Systems Engineering degree programme, 16 students for or Bachelor of Information Systems (Honours) Business Information Systems degree programme, 10 students for Bachelor of Information Technology (Honours) Computer Engineering programme and 1 student for Bachelor of Information Technology (Honours) Communications and Networking degree programme.

On August 2009, when FSET was dissolved into 3 different faculties, the new FICT was set up in the Perak campus to take charge of the ICT programmes. In the same year, the first batch of students from FICT at the Perak campus in Kampar (consisting of 21 students from Bachelor of Information Systems (Honours) Business Information Systems degree programme and 18 students from Bachelor of Information Systems (Honours) Information Systems Engineering degree programme) was sent for their internship. The FICT in Petaling Jaya remained to operate until the end of 2010 after the graduation of the last batch of FICT undergraduates that were based in the Petaling Jaya campus and all operations of FICT were thereafter fully shifted to the Perak campus.

7.1.2 Deadlines of Academic Processes

No	Events	Short Trimester (1-7 Weeks)	Long Trimester (1-14 Weeks)
1	Faculty Administration Matter		
	Online Verification of Student Particulars (new students)	Week 1 - Week 3	Week 1 - Week 4
	Release of Exemption / Credit Transfer Status (Technical/LAN Courses)	Week 4	Week 6 - Week 7
	Course Verification Exercise	Week 5	Week 5 - Week 6
	Student Survey	Week 4 - Week 6	Week 9 - Week 13
2	Student Bill		
	Generation of student bills	Week 2	Week 2
	Payment of student bills	Week 3 - Week 4	Week 3 - Week 4
3	Registration		
	Add/Drop Week	Week 1 - Week 2	Week 1 - Week 2
	Repeat Registration	Week 1 - Week 2	Week 1 - Week 2
	Application for programme transfer	Week 1 - Week 2	Week 1 - Week 2
	Application for exemption/internal credit transfer (Technical/LAN course)	Week 1 - Week 2	Week 1 - Week 2
4	Timetable Planning		
	Notice to inform students on the timetable and pre-registration for next trimester	**Week 6	**Week 12
	Pre-registration Week (to pre-register the unit(s) to be taken in next trimester)	Week 6 - Week 7	Week 13 - Week 14
5	Bar List		
	Attendance to be key in web2	Week 5	Week 12
	Bar list to be released to students	Week 6	Week 13
	Interview/Appeal on bar list by students to HOD/HOP	Week 6	Week 13
	Deadline for appeal on bar list by students	Week 6	Week 13
	Final bar list (after interview/appeal) to be announced to students	Week 7	Week 14
6	Deferment / Withdrawal of unit(s) - No refund		
	Final date to apply for leave of absence	Week 5	Week 10
	Withdrawal of Unit (No Refund)	Week 3 - Week 5	Week 3 - Week 12
	Final date for withdrawal of unit (No Refund)	Week 5	Week 12

7.2 Our Offered Programme

7.2.1 Bachelor of Information Systems (Honours) Information Systems Engineering

MQA Approval:	(R3/481/6/0773)03/27(MQA/FA14998)
Duration:	3 years
Intakes:	January, June & October
Course Fees:	RM49,250 (Malaysia), RM66,700 (International)
Medium of Instruction:	English
Campus:	Kampar, Perak
Faculty:	Faculty of Information and Communication Technology (FICT)

Overview

The programme allows the students to specialize in one of the following areas namely Web Technologies, Mobile Technologies, Database Management, Data Mining and Big Data. The programme aims to provide its graduates with the skills and knowledge to take on appropriate professional positions in the field of Information Technology and to develop Information Systems to support operations and activities of organizations. The programme also enables the students to reach at leadership positions in the industry and research pursuance for postgraduate studies in the field. Graduates of this programme will be equipped with competent emerging technical skills and knowledge to

systematically engineer (i.e. plan, analyze, design and develop) information systems using appropriate methodologies and techniques.

Highlights

1. Students are introduced to the emerging technologies and the best practices of the industry which they will apply in problem-based courseworks, final year projects and industrial training. These technologies include Alibaba platform for ecommerce and digital entrepreneurship; 7 Oracle, Microsoft Visual Studio.Net, IBM Cognos for Business Intelligence; 7 C#.Net, Java, Android sStudio, iOS solutions and web-based solutions, to name a few. Main emphasis is given to the hands-on practical sessions so that students will be able to apply their knowledge to produce real-life and workable information systems and solutions. In addition, the graduates will be exposed to the knowledge on the management, standardization and maintenance of information systems in organizations.
2. More than 90% of graduates are able to find jobs, with the remaining numbers start up their businesses, or pursue postgraduate studies within six months after their final examinations; quality and performance of our students are well received by the employers.
3. Actively working with international collaborators under the International Collaborative Partner (ICP) programme.

4. The programme is designed with benchmarks of the industry demand, curriculum recommended by Association for Computing Machinery (ACM), and similar programmes of other renowned top-ranking local/overseas universities. The programme is reviewed every year with feedback from an External Examiner from an established university abroad, and local industry experts whereby Industry Advisory Panel (IAP) is engaged to act as advisory board to provide industry requirements and feedback to continuously enhance the programme. Therefore, students are trained to be technically competent in planning, analysing, designing and developing information systems using appropriate emerging methodologies and techniques apart from being exposed with knowledge on the management and maintenance of information systems in organizations.
5. Good collaboration with renowned software vendors like Microsoft (MSDNAA), Oracle (OAI) and IBM (IBM Academic Initiative), SAP, CISCO, Huawei, Intel and MIMOS, and service providers including Alibaba, and has invested significantly on providing excellent teaching and laboratory facilities such as Microsoft Software Engineering Laboratory, Enterprise Systems and Database Laboratory, Huawei Networking Laboratory, CISCO Network Academy Laboratory, Intel Microprocessor Design Laboratory, and Big Data and IoT Laboratory in order to meet the industrial standards.

Entry Requirements

STPM with minimum of Grade C (GP 2.00) in any 2 subjects and Credit in Mathematics at SPM level/equivalent*

STAM with minimum grade of Jayyid in any 2 subjects and Credit in Mathematics at SPM level/equivalent*

A-Levels with minimum of Grade D in any 2 subjects and Credit in Mathematics at SPM level/equivalent*

UEC with Grade B in 5 subjects and Credit in Mathematics at SPM level/equivalent*

SAM with a Australian Tertiary Admission Rank (ATAR) 70 and Grade B in any 2 subjects and Credit in Mathematics at SPM level/equivalent*

CPU with an average of 70% in 6 relevant subjects and Credit in Mathematics at SPM level/equivalent*

Diploma (Level 4, MQF) in the relevant field with Diploma in Computing (Level 4, MQF) / equivalent with a minimum CGPA of 2.50 (Note: Candidates with CGPA below 2.50 but above 2.00 may be admitted subject to a thorough internal evaluation process) OR

Diploma in Non-Computing (Level 4, MQF) with a minimum CGPA of 2.75 AND credit in: a) Mathematics at SPM level/equivalent, OR b) Candidates with a pass in Mathematics at SPM level/equivalent are required to take and pass the Mathematics Enhancement Course (MEC) as a pre-requisite before they could proceed to join this programme (Note: Candidates with CGPA below 2.75 but above 2.50 may be admitted subject to a thorough internal evaluation process)

TVET Diplomas: Diploma Kemahiran Malaysia (DKM) / Diploma Vokasional Malaysia (DVM) / Diploma Lanjutan Kemahiran Malaysia (DLKM) with fully accredited by MQA, DKM/DLKM/DVM in Computing fields with a minimum

CGPA of 2.50 subject to Senate / Academic Board's approval, Applicants will be required to pass the admission screening process conducted by the faculty and may be required to undergo the Bridging programme, if necessary, during the period of their study in addition to the existing curriculum structure and Credit transfer can be considered on a case-to-case basis and subject to existing credit transfer policies which are in effect.

Foundation from UTAR with minimum CGPA of 2.00 and MUST have a credit in Mathematics at SPM level/equivalent*

Matriculation / Foundation from other Institutions of Higher Learning with minimum CGPA of 2.00 and MUST have a credit in Mathematics at SPM level/equivalent*

Other equivalent qualifications recognized by the Malaysian Government MUST have a credit in Mathematics at SPM level/equivalent*

*Note: 1. Candidates with a pass in Mathematics at SPM Level/equivalent are required to take and pass the Mathematics Enhancement Course (MEC) as a pre-requisite before they could join this programme. 2. Candidates from Foundation/Matriculation/other equivalent qualification can be exempted from taking MEC if their admission qualification contains Mathematics subject(s) which is higher than the SPM Mathematics.

Career Prospects

- Database Administrator/ Developer
- IT Solution Architect
- Project Engineer/Manager
- Software Engineer

- System Analyst/Consultant
- System Developer/Engineer
- QA Engineer
- Web/Mobile Applications Developer

7.2.2 Bachelor of Information Systems (Honours) Business Information Systems

MQA Approval:	(R3/481/6/0772)03/27(FA14999)
Duration:	3 years
Intakes:	January, June & October
Course Fees:	RM49,250 (Malaysia), RM66,700 (International)
Medium of Instruction:	English
Campus:	Kampar, Perak
Faculty:	Faculty of Information and Communication Technology (FICT)

Overview

The Bachelor of Information Systems (Honours) Business Information Systems at Universiti Tunku Abdul Rahman (UTAR) is a comprehensive three-year undergraduate program designed to equip students with the necessary skills to integrate business needs with information systems. The programme aims to equip students with good knowledge and skills to transform business requirements or needs into information systems providing solutions. Students are exposed to the formal methods and techniques of business process modeling, business requirements analysis, data analytics and management, and business decision-making in order to provide solutions and systems that meet the needs of an organization. As such, students are trained and prepared with good knowledge and hands-on skills in the applying latest software and

tools especially for the Business Intelligence and Analytics, Digital Entrepreneurship, Big Data Management and Data Mining.

Highlight

1. The programme places a strong emphasis on producing work-ready ICT graduates through its practical and applied approach, which includes industrial training and ICT industry projects. Students are exposed to emerging technologies and industry best practices, which they incorporate into their assignments, final year projects, and industrial training. These technologies encompass Python for business programming, Microsoft Power BI for business intelligence and analytics, Oracle for database management, Alibaba for eCommerce and digital entrepreneurship, as well as Microsoft Visual Studio .NET and many more.
2. 90% of graduates are able to find jobs, start up their business, or pursue postgraduate studies within six months after their final examinations; quality and performance of our students are well-received by the employers.
3. Actively working with international collaborators under the International Collaborative Partner (ICP) programme.
4. This programme is accredited by MQA and approved by MOE. The programme is designed with benchmarks of the industry demand, curriculum recommended by Association for Computing Machinery (ACM), and similar programmes of other renowned local/overseas universities. The programme is reviewed every year with the feedback

form an External Examiner from an overseas university, and local industry experts whereby Industry Advisory Panel (IAP) is engaged to act as an advisory board to provide industry requirements and feedback to the programme. Therefore, students are trained to become technically competent in design, development and implementation of Business Information Systems as well as to possess knowledge and skills to become both computer-savvy business people and business savvy technical people for lifelong learning, research and career.

5. Good collaboration with renowned software vendors like Microsoft (MSDNAA), Oracle (OAI), and IBM (IBM Academic Initiative), low code platform (Inistate) , CISCO, and service providers like Alibaba, Huawei Networking Laboratory, CISCO Network Academy Laboratory, Big Data and IoT Laboratory, and Intel Microprocessor Design Laboratory in order to meet the industrial standards.

Entry Requirements

7.2.3 Bachelor of Information Systems (Honours) Digital Economy Technology

MQA Approval:	(N482/6/0210)04/26(PA13966)
Duration:	3 years
Intakes:	January, June & October
Course Fees:	RM48,900 (Malaysia), RM66,250 (International)
Medium of Instruction:	English
Campus:	Kampar, Perak
Faculty:	Faculty of Information and Communication Technology (FICT)

Overview

The Bachelor of Information Systems (Honours) Digital Economy Technology is a three-year programme that aims to equip students with digital competencies such as basic programming or data analysis and visualisation skills, which are essential to thrive in today's job market; and transferable skills, applicable in various professional and social contexts, such as the ability to find and select information, critical thinking, teamwork and communication. The curriculum is designed to equip students with essential digital competencies, including:

- Basic programming and Application programming
- Data analysis and visualization skills
- Cybersecurity

- E-commerce
- Database development
- Financial Technology

Students will also develop transferable skills such as critical thinking, teamwork, and communication, which are vital in various professional contexts. This programme also represents a forward-thinking approach to education in the digital age, addressing the growing need for skilled professionals in Malaysia's rapidly evolving digital economy.

Highlight

1. UTAR Bachelor of Information Systems (Honours) Digital Economy Technology programme has worked with leading industrial MOU partners in syllabus collaboration in various subjects, and prepares graduates in:
 - Study with combination of industrial & digital technology across socioeconomic activities
 - Talent cultivation for revolution on the fusion of industrial and digital technologies
 - Catalyst mindset of next phase of economy, as many industries already embracing digital economy
 - Quality Education in digital competency in many fields such as business, healthcare, education, cross-border commerce, etc.
 - Exposure in digital economy eco-systems, both in the East (eg: The Regional Comprehensive Economic Partnership (RCEP) countries, especially China) and the West (US and Europe).
 - Innovation of next generation of products and services via digital economy activities.

- Provide competitive Talents in an Integrated Market with Integrated Platforms in RCEP region.
2. There is a strong emphasis on producing work ready ICT graduates through its practical and applied orientation as well as its industrial training and ICT industry projects. Besides, students are introduced to the emerging technologies used and the best practices of the industry which they apply in the assignments, final year projects and industrial training. These technologies include Python for business programming, Microsoft Power BI for business intelligence and analytics, Oracle for database, Alibaba for eCommerce and digital entrepreneurship, Microsoft Visual Studio .Net, and many more.
 3. 90% of graduates are able to find jobs, start up their business, or pursue postgraduate studies within six months after their final examinations; quality and performance of our students are well-received by the employers.
 4. The programme is developed in accordance with recommendations from the Association for Computing Machinery (ACM) and is regularly reviewed based on feedback from an External Examiner from an overseas university and local industry experts. The Industry Advisory Panel (IAP) plays a crucial role in providing insights into industry requirements, ensuring that the program remains relevant and effective. Therefore, students are trained to become technically competent in design, development and implementation of Digital Economy Technology as well as to possess knowledge and skills to become both computer-savvy business people and business savvy technical people for lifelong learning, research and career.

Good collaboration with renowned software vendors like Microsoft (MSDNAA), Oracle (OAI), and IBM (IBM Academic Initiative), low code platform (Inistate) , CISCO, and service providers like Alibaba, Silverlake Laboratory, Huawei Networking Laboratory, CISCO Network Academy Laboratory, Big Data and IoT Laboratory, and Intel AI Laboratory in order to meet the industrial standards.

Entry Requirements

STPM with minimum of Grade C (GP 2.00) in any 2 subjects and Credit in Mathematics at SPM level/equivalent*

STAM with minimum grade of Jayyid in any 2 subjects and Credit in Mathematics at SPM level/equivalent*

A-Levels with minimum of Grade D in any 2 subjects and Credit in Mathematics at SPM level/equivalent*

UEC with Grade B in 5 subjects and Credit in Mathematics at SPM level/equivalent*

SAM with a Australian Tertiary Admission Rank (ATAR) 70 and Grade B in any 2 subjects and Credit in Mathematics at SPM level/equivalent*

CPU with an average of 70% in 6 relevant subjects and Credit in Mathematics at SPM level/equivalent*

Diploma (Level 4, MQF) in the relevant field with Diploma in Computing (Level 4, MQF) / equivalent with a minimum CGPA of 2.50 (Note: Candidates with CGPA below 2.50 but above 2.00 may be admitted subject to a thorough internal evaluation process) OR

Diploma in Non-Computing (Level 4, MQF) with a minimum CGPA of 2.75 AND credit in: a) Mathematics at SPM level/equivalent, OR b) Candidates with a pass in Mathematics at SPM level/equivalent are required to take and pass the Mathematics Enhancement Course (MEC) as a pre-requisite before they could proceed to join this programme (Note: Candidates with CGPA below 2.75 but above 2.50 may be admitted subject to a thorough internal evaluation process)

TVET Diplomas: Diploma Kemahiran Malaysia (DKM) / Diploma Vokasional Malaysia (DVM) / Diploma Lanjutan Kemahiran Malaysia (DLKM) with fully accredited by MQA, DKM/DLKM/DVM in Computing fields with a minimum CGPA of 2.50 subject to Senate / Academic Board's approval, Applicants will be required to pass the admission screening process conducted by the faculty and may be required to undergo the Bridging programme, if necessary, during the period of their study in addition to the existing curriculum structure and Credit transfer can be considered on a case-to-case basis and subject to existing credit transfer policies which are in effect.

Foundation from UTAR with minimum CGPA of 2.00 and MUST have a credit in Mathematics at SPM level/equivalent*

Matriculation / Foundation from other Institutions of Higher Learning with minimum CGPA of 2.00 and MUST have a credit in Mathematics at SPM level/equivalent*

Other equivalent qualifications recognized by the Malaysian Government MUST have a credit in Mathematics at SPM level/equivalent*

*Note: 1. Candidates with a pass in Mathematics at SPM Level/equivalent are required to take and pass the Mathematics Enhancement Course (MEC) as a

pre-requisite before they could join this programme. 2. Candidates from Foundation/Matriculation/other equivalent qualification can be exempted from taking MEC if their admission qualification contains Mathematics subject(s) which is higher than the SPM Mathematics.

Career Prospect

- Business Intelligence Specialist
- Business System Administrator
- Data/Business Analyst
- Digital Entrepreneur
- Functional Consultant
- IT Business Development Consultant/ Manager
- IT Customer Support
- IT Project Exclusive/ Manager
- System Development Engineer
- Web Platform

7.2.4 Bachelor of Information Technology (Honours) Communications and Networking

MQA Approval:	(R2/481/6/0485)11/25(MQA/FA15000)
Duration:	3 years
Intakes:	January, June & October
Course Fees:	RM48,900 (Malaysian), RM66,250 (International)
Medium of Instruction:	English
Campus:	Kampar, Perak
Faculty:	Faculty of Information and Communication Technology (FICT)

Overview

The programme aims to achieve a balance between theoretical approaches and practical implementations in communications and networking with the objective to support the communication needs of industries and commercial activities.

This programme prepares graduates to:

- be technically competent in design, development and implementation of communications and network systems;
- have strong analytical and critical thinking skills to solve problems by applying knowledge, principles and skills in communications and networking;
- possess solid Internet background and computing knowledge for analysing, modeling, and evaluating networking solutions;
- Understand the needs of industries and commercial activities for communications and networking, and develop network systems to support these needs.

Highlights

1. Students are introduced to the current technologies used and the best practices of the industry at the early stage and will apply them in the form of assignments, mini projects and final year projects. These technologies include CISCO and Huawei solutions.
2. Strong focus on cybersecurity skills to better prepare the graduate for maintaining the organisation's network and keeping the networks running securely.

3. 90% of graduates secured jobs within 6 months from their last final examinations, testifying our students are well-received by the employers.
4. Strong industry collaboration with Microsoft, Oracle, CISCO, Huawei, Intel, Palo Alto and EC-council.
5. More than 70% of the academic staff involved in teaching Communications and Networking subjects are PhD holders with strong research and teaching background.
6. The faculty has invested significantly in providing excellent teaching and laboratory facilities such as Microsoft Software Engineering Laboratory, Huawei Networking Laboratory, CISCO Network Academy Laboratory, Palo Alto Networks Cybersecurity Academy and Intel AI Laboratory in order to meet the industrial standards.

Entry Requirements

STPM with minimum of Grade C (GP 2.00) in any 2 subjects and Credit in Mathematics at SPM level/equivalent*

STAM with minimum grade of Jayyid in any 2 subjects and Credit in Mathematics at SPM level/equivalent*

A-Levels with minimum of Grade D in any 2 subjects and Credit in Mathematics at SPM level/equivalent*

UEC with Grade B in 5 subjects and Credit in Mathematics at SPM level/equivalent*

SAM with a Australian Tertiary Admission Rank (ATAR) 70 and Grade B in any 2 subjects and Credit in Mathematics at SPM level/equivalent*

CPU with an average of 70% in 6 relevant subjects and Credit in Mathematics at SPM level/equivalent*

Diploma (Level 4, MQF) in the relevant field with Diploma in Computing (Level 4, MQF) / equivalent with a minimum CGPA of 2.50 (Note: Candidates with CGPA below 2.50 but above 2.00 may be admitted subject to a thorough internal evaluation process) OR

Diploma in Non-Computing (Level 4, MQF) with a minimum CGPA of 2.75 AND credit in: a) Mathematics at SPM level/equivalent, OR b) Candidates with a pass in Mathematics at SPM level/equivalent are required to take and pass the Mathematics Enhancement Course (MEC) as a pre-requisite before they could proceed to join this programme (Note: Candidates with CGPA below 2.75 but above 2.50 may be admitted subject to a thorough internal evaluation process)

TVET Diplomas: Diploma Kemahiran Malaysia (DKM) / Diploma Vokasional Malaysia (DVM) / Diploma Lanjutan Kemahiran Malaysia (DLKM) with fully accredited by MQA, DKM/DLKM/DVM in Computing fields with a minimum CGPA of 2.50 subject to Senate / Academic Board's approval, Applicants will be required to pass the admission screening process conducted by the faculty and may be required to undergo the Bridging programme, if necessary, during the period of their study in addition to the existing curriculum structure and Credit transfer can be considered on a case-to-case basis and subject to existing credit transfer policies which are in effect.

Foundation from UTAR with minimum CGPA of 2.00 and MUST have a credit in Mathematics at SPM level/equivalent*

Matriculation / Foundation from other Institutions of Higher Learning with minimum CGPA of 2.00 and MUST have a credit in Mathematics at SPM level/equivalent*

Other equivalent qualifications recognized by the Malaysian Government MUST have a credit in Mathematics at SPM level/equivalent*

*Note: 1. Candidates with a pass in Mathematics at SPM Level/equivalent are required to take and pass the Mathematics Enhancement Course (MEC) as a pre-requisite before they could join this programme. 2. Candidates from Foundation/Matriculation/other equivalent qualification can be exempted from taking MEC if their admission qualification contains Mathematics subject(s) which is higher than the SPM Mathematics.

Career Prospect

- Cybersecurity Analyst
- Communications System Developer
- IT Consultant
- IT Security Specialist
- Network Administrator/Designer
- Network Engineer
- Network Security Architect

7.2.5 Bachelor of Information Technology (Honours) Computer Engineering

MQA Approval:	(R2/481/6/0420)05/24(MQA/FA15495)
Duration:	3 years
Intakes:	January, June & October
Course Fees:	RM49,250 (Malaysian), RM66,700 (International)
Medium of Instruction:	English
Campus:	Kampar, Perak
Faculty:	Faculty of Information and Communication Technology (FICT)

Overview

The programme prepares graduates to be competent in the discipline of Computer Engineering that drives the advancement of information and communication technology (ICT). It emphasis design skills and knowledge that integrates both hardware and software into a system such as embedded systems and computer architectures.

The programme is to produce graduates with skills in using sophisticated software design tools for designing electronic circuits and systems. To break away from the theory-based traditional learning style, we tend to emphasis more on practical design work, to put theory into practice.

Highlights

1. Students are introduced to the current technologies used and the best practices of the industry at the early stage and will apply them in the form of assignments, mini projects and final year projects. These technologies include Xilinx ISE Foundation and FPGA, ModelSim, MultiSim, etc.
2. 95% graduates secured jobs within 6 months of graduation – roughly 50% in electronic hardware related companies and 50% in software companies, indicating the graduates have a choice to venture into software or hardware related career paths.
3. Career prospects with Huawei, Intel, Motorola, Keysight, HP and Vitrox, Philips, Hitachi and software companies in general, ect.
4. The faculty has invested significantly in providing excellent teaching and laboratory facilities such Microsoft Software Engineering Laboratory, Huawei Networking Laboratory, CISCO Network Academy Laboratory and Intel AI Laboratory in order to meet the industrial standards.

Entry Requirements

STPM with minimum of Grade C (GP 2.00) in any 2 subjects, credit in Mathematics at SPM level/equivalent and pass in SPM Physics/equivalent

STAM with minimum grade of Jayyid in any 2 subjects, Credit in Mathematics at SPM level/equivalent and pass in SPM Physics/equivalent

A-Levels with minimum of Grade D in any 2 subjects, credit in Mathematics at SPM level/equivalent and pass in SPM Physics/equivalent

UEC with Grade B in 5 subjects, credit in Mathematics at SPM level/equivalent and pass in SPM Physics/equivalent

SAM with a Australian Tertiary Admission Rank (ATAR) 70 and Grade B in any 2 subjects, credit in Mathematics at SPM level/equivalent and pass in SPM Physics/equivalent

CPU with an average of 70% in any 6 subjects, credit in Mathematics at SPM level/equivalent and pass in SPM Physics/equivalent

Diploma (Level 4, MQF) in the relevant field with Diploma in Computing (Level 4, MQF) / equivalent with a minimum CGPA of 2.50 (Note: Candidates with CGPA below 2.50 but above 2.00 may be admitted subject to a thorough internal evaluation process) OR

Any Diploma in Science and Technology (Level 4, MQF) with a minimum CGPA of 2.75 (Note: Candidates with CGPA below 2.75 but above 2.00 may be admitted subject to a thorough internal evaluation process)

TVET Diplomas: Diploma Kemahiran Malaysia (DKM) / Diploma Vokasional Malaysia (DVM) / Diploma Lanjutan Kemahiran Malaysia (DLKM) with fully accredited by MQA, DKM/DLKM/DVM in Computing fields with a minimum CGPA of 2.50 subject to Senate / Academic Board's approval, Applicants will be required to pass the admission screening process conducted by the faculty and may be required to undergo the Bridging programme, if necessary, during the period of their study in addition to the existing curriculum structure and Credit transfer can be considered on a case-to-case basis and subject to existing credit transfer policies which are in effect.

Foundation from UTAR with minimum CGPA of 2.00 and MUST have a credit in Mathematics at SPM level/equivalent*

Matriculation / Foundation from other Institutions of Higher Learning in the relevant field with minimum CGPA of 2.00 and MUST have a credit in Mathematics at SPM level/equivalent

Other equivalent qualifications recognized by the Malaysian Government MUST have a credit in Mathematics at SPM level/equivalent

Career Prospects

- Computer Engineer
- Embedded Control Engineer
- Firmware Engineer
- IC Design Engineer
- Product Engineer
- System Design Engineer
- System/Programme Development Engineer
- Validation Engineer

7.2.6 Bachelor of Information Technology (Honours) Industrial Intelligent Systems

MQA Approval:	(N/0611/6/0018)07/28(MQA/PA15869)
Duration:	3 years
Intakes:	January, June & October
Course Fees:	RM48,900 (Malaysian), RM66,250 (International)
Medium of Instruction:	English
Campus:	Kampar, Perak
Faculty:	Faculty of Information and Communication Technology (FICT)

Overview

Digital transformation is changing how industries operate and there is no way back. In the age of Industry 4.0, industries across all sectors are embracing intelligent technologies to stay competitive. From manufacturing and healthcare to finance and entertainment, the integration of intelligent technologies has revolutionized processes, streamlined operations, and unlocked new potential. The Industrial Intelligent Systems programme

integrates advanced technologies such as artificial intelligence, machine learning, data analytics, and the Internet of Things into industrial processes and operations. This integration aims to enhance efficiency, productivity, and decision-making. The program harnesses the power of data and automation to revolutionize traditional industries, including manufacturing, energy, logistics, and beyond.

Highlight

1. Students are introduced to cutting-edge tools and knowledge that empower them to excel in Industry 4.0, focusing on advanced intelligence technologies within the Industrial Intelligent Systems field.
2. Students are provided with a solid IT foundation, including programming, networking, and databases, and gain expertise in core Industry 4.0 technologies such as digitalization, artificial intelligence, robotics, automation, and data-driven decision-making.
3. Students have the opportunity to engage in a work-based learning program, where they can spend two years on campus and a final year immersed in the industry, receive mentorship from industry leaders, and gain practical experience in real-world environments.
4. Students are equipped with hands-on experience, specialized education, and essential soft skills through immersive learning in real work environments, ensuring students are well-prepared for careers in Industrial Intelligent Systems.

5. The curriculum combines theoretical knowledge with practical applications, enabling students to innovate in Industrial Intelligent Systems and prepare for a rapidly evolving technological landscape. The programme undergoes annual reviews with feedback from an External Examiner from an overseas university and local industry experts. The Industry Advisory Panel (IAP) ensures the program meets industry standards through continuous feedback and guidance.

Entry Requirements

STPM with minimum of Grade C (GP 2.00) in any 2 subjects and Credit in Mathematics at SPM level/equivalent*

STAM with minimum grade of Jayyid in any 2 subjects and Credit in Mathematics at SPM level/equivalent*

A-Levels with minimum of Grade D in any 2 subjects and Credit in Mathematics at SPM level/equivalent*

UEC with Grade B in 5 subjects and Credit in Mathematics at SPM level/equivalent*

SAM with a Australian Tertiary Admission Rank (ATAR) 70 and Grade B in any 2 subjects and Credit in Mathematics at SPM level/equivalent*

CPU with an average of 70% in 6 relevant subjects and Credit in Mathematics at SPM level/equivalent*

Diploma (Level 4, MQF) in the relevant field with Diploma in Computing (Level 4, MQF) / equivalent with a minimum CGPA of 2.50 (Note: Candidates with

CGPA below 2.50 but above 2.00 may be admitted subject to a thorough internal evaluation process) OR

Diploma in Non-Computing (Level 4, MQF) with a minimum CGPA of 2.75 AND credit in: a) Mathematics at SPM level/equivalent, OR b) Candidates with a pass in Mathematics at SPM level/equivalent are required to take and pass the Mathematics Enhancement Course (MEC) as a pre-requisite before they could proceed to join this programme (Note: Candidates with CGPA below 2.75 but above 2.50 may be admitted subject to a thorough internal evaluation process)

TVET Diplomas: Diploma Kemahiran Malaysia (DKM) / Diploma Vokasional Malaysia (DVM) / Diploma Lanjutan Kemahiran Malaysia (DLKM) with fully accredited by MQA, DKM/DLKM/DVM in Computing fields with a minimum CGPA of 2.50 subject to Senate / Academic Board's approval, Applicants will be required to pass the admission screening process conducted by the faculty and may be required to undergo the Bridging programme, if necessary, during the period of their study in addition to the existing curriculum structure and Credit transfer can be considered on a case-to-case basis and subject to existing credit transfer policies which are in effect.

Foundation from UTAR with minimum CGPA of 2.00 and MUST have a credit in Mathematics at SPM level/equivalent*

Matriculation / Foundation from other Institutions of Higher Learning with minimum CGPA of 2.00 and MUST have a credit in Mathematics at SPM level/equivalent*

Other equivalent qualifications recognized by the Malaysian Government MUST have a credit in Mathematics at SPM level/equivalent*

*Note: 1. Candidates with a pass in Mathematics at SPM Level/equivalent are required to take and pass the Mathematics Enhancement Course (MEC) as a pre-requisite before they could join this programme. 2. Candidates from Foundation/Matriculation/other equivalent qualification can be exempted from taking MEC if their admission qualification contains Mathematics subject(s) which is higher than the SPM Mathematics.

Career Prospect

- System Architect
- System Integrator
- System Engineer
- IT Analyst
- IT Project Coordinator
- IT Support Engineer
- Digital Transformation Executive
- Data Analyst
- Data Strategist

<https://study.utar.edu.my/industrial-intelligent-systems.php>

7.2.7 Bachelor of Computer Science (Honours)

MQA Approval:	(R3/481/6/0128)03/27(MQA/FA15001)
Duration:	3 years, 6 years (Part-time)
Intakes:	January, June & October
Course Fees:	RM49,250 (Malaysian), RM52,000 (Part-time, Malaysian) RM66,700 (International)
Medium of Instruction:	English
Campus:	Kampar, Perak
Faculty:	Faculty of Information and Communication Technology (FICT)

Overview

The programme aims to prepare graduates who are technically competent in design, development and implementation of computer systems. Students will be equipped with suitable mathematical background and solid computing knowledge for analyzing, modeling and evaluating computing solutions. Student will be trained to possess strong analytical and critical thinking to solve problems by applying knowledge, principles and skills in Computer Science.

The programme also prepares graduates to possess awareness and skills for lifelong learning, research and career development. It equips graduates with communication, team, leadership and interpersonal skills and awareness of the

social, ethical and legal responsibilities, Student will be provided with entrepreneurial skill and a broad business and real world perspective.

Highlights

1. Statistics shows that more than 90% of our graduates are able to find jobs, start up their businesses, or pursue postgraduate studies six months after their final examinations.
2. This programme is accredited by MQA and approved by MOE. It is carefully designed with benchmarks to the industry demand, curriculum recommended by Association for Computing Machinery (ACM), and similar programmes of other renowned local/overseas universities. This programme is reviewed every year with the feedback from an external examiner and the Industry Advisory Panel. The Industry Advisory Panel consists of local industry experts who are invited to act as an advisor board to provide industry requirements and feedback to the programme.
3. The faculty have good collaborations with renowned software vendors like Amazon Web Services (AWS), Microsoft (Azure), Oracle and IBM Cloud. Therefore, students will be given a chance to explore new technologies from these vendors.
4. The faculty has been recruiting lecturers with PhD degree or Master's degree with rich industrial experience. The academic staff are actively involved in the R&D projects and consultancy work in the relevant fields. Additional. the

academic staff send for training to keep abreast with the latest ICT technology. With this knowledge and experience will be imparted to students during the study.

5. The students are given intensive practical sessions during their study in UTAR to build up their study and skills which is required in the current job market. Furthermore, the students will undergo a 3-5 months of industrial Training during their course of study so that they are exposed to actual working environment and apply the knowledge that they have learn in a real life environment.

6. The faculty has invested significantly on providing excellent teaching and laboratory facilities, such Apple iMac Laboratory, Microsoft Software Engineering Laboratory, Silverlake Lab, Huawei Networking Laboratory, CISCO Networking Academy Laboratory, Final Year Project Laboratory, Intel AI Lab, GDEX Technovate Lab and IoT and Big Data Laboratory in order to meet the industrial standards. In their final year, students will also have chance to develop their final year project in the final year project laboratory which is equipped with state-of the-arts PCs and IT devices.

Entry Requirements

STPM (Science Stream) with a minimum of Grade C (GP2.00) in 1 Mathematics subject and 1 Science/ICT subject OR

Arts Stream with a minimum of Grade C (GP 2.00) in any 2 subjects AND a credit in: a) Additional Mathematics at SPM level/equivalent, OR b) Mathematics and any one of the Science, Technology or Engineering subjects at SPM level/equivalent*

(*For category (b), candidates must take and pass Mathematics Enhancement Course (MEC) as a pre-requisite before they could proceed to take related core courses in this programme)

STAM with minimum grade of Jayyid in any 2 subjects AND a credit in: a) Additional Mathematics at SPM level/equivalent, OR b) Mathematics and any one of the Science, Technology or Engineering subjects at SPM level/equivalent*

(*For category (b), candidates must take and pass Mathematics Enhancement Course (MEC) as a pre-requisite before they could proceed to take related core courses in this programme)

A-Levels with Grade D in 1 Mathematics subject and 1 Science/ ICT subject OR

2 Grade D AND a credit in: a) Additional Mathematics at SPM level/equivalent, OR b) Mathematics and any one of the Science, Technology or Engineering subjects at SPM level/equivalent*

(*For category (b), candidates must take and pass Mathematics Enhancement Course (MEC) as a pre-requisite before they could proceed to take related core courses in this programme)

UEC with Grade B in 5 subjects including 1 Mathematics subject and 1 Science/ICT subject OR

Grade B in 5 subjects AND a credit in: a) Additional Mathematics at SPM level/equivalent, OR b) Mathematics and any one of the Science, Technology or Engineering subject at SPM level/equivalent*

(*For category (b), candidates must take and pass Mathematics Enhancement Course (MEC) as a pre-requisite before they could proceed to take related core courses in this programme)

SAM with a Australian Tertiary Admission Rank (ATAR) 70 and Grade B in 1 Mathematics and 1 Science/ICT subject OR

Australian Tertiary Admission Rank (ATAR) 70 and Grade B in 2 subjects AND a credit in: a) Additional Mathematics at SPM level/equivalent, OR b) Mathematics and any one of the Science, Technology or Engineering subject at SPM level/equivalent*

(*For category (b), candidates must take and pass Mathematics Enhancement Course (MEC) as a pre-requisite before they could proceed to take related core courses in this programme)

CPU with an average of 70% in 1 Mathematics, 1 Science/ ICT subject and 4 other subjects OR

An average of 70% in 6 subjects AND a credit in: a) Additional Mathematics at SPM level/equivalent, OR b) Mathematics and any one of the Science, Technology or Engineering subject at SPM level/equivalent*

(*For category (b), candidates must take and pass Mathematics Enhancement Course (MEC) as a pre-requisite before they could proceed to take related core courses in this programme)

Diploma (Level 4, MQF) in the relevant field with Diploma in Computing (Level 4, MQF) / equivalent with a minimum CGPA of 2.50 (Note: Candidates with CGPA below 2.50 but above 2.00 may be admitted subject to a thorough internal evaluation process) OR

Any Diploma in Science and Technology (Level 4, MQF) with a minimum CGPA of 2.75 AND credit in: a) Additional Mathematics at SPM level/equivalent, OR b) Mathematics and any one of the Science, Technology or Engineering subjects at SPM level/equivalent. Candidates are required to take and pass Mathematics Enhancement Course (MEC) as a pre-requisite before they could proceed to join this programme. (Note: Candidates with CGPA below 2.75 but above 2.50 may be admitted subject to a thorough internal evaluation process)

TVET Diplomas: Diploma Kemahiran Malaysia (DKM) / Diploma Vokasional Malaysia (DVM) / Diploma Lanjutan Kemahiran Malaysia (DLKM) with fully accredited by MQA, DKM/DLKM/DVM in Computing fields with a minimum CGPA of 2.50 subject to Senate / Academic Board's approval, Candidates will be required to pass the admission screening process conducted by the faculty and may be required to undergo the Bridging programme, if necessary, during the period of their study in addition to the existing curriculum structure and Credit transfer can be considered on a case-to-case basis and subject to existing credit transfer policies which are in effect.

Foundation from UTAR with minimum CGPA of 2.00 for Foundation/Matriculation/equivalent qualification, MUST have Either 1 of the following: a) Pass in Mathematics subject equivalent to SPM Additional Mathematics in the Foundation/Matriculation or other equivalent qualification, OR b) A credit in Additional Mathematics at SPM level/equivalent, OR c) A credit in Mathematics and any one of the Science, Technology or Engineering subject at SPM level/equivalent*

(*For category (c), candidates must take and pass Mathematics Enhancement Course (MEC) as a pre-requisite before they could proceed to take related core courses in this programme)

Matriculation / Foundation from other Institutions of Higher Learning with minimum CGPA of 2.00 for Foundation/Matriculation/equivalent qualification, MUST have Either 1 of the following: a) Pass in Mathematics subject equivalent to SPM Additional Mathematics in the Foundation/Matriculation or other equivalent qualification, OR b) A credit in Additional Mathematics at SPM level/equivalent, OR c) A credit in Mathematics and any one of the Science, Technology or Engineering subject at SPM level/equivalent*

(*For category (c), candidates must take and pass Mathematics Enhancement Course (MEC) as a pre-requisite before they could proceed to take related core courses in this programme)

Other equivalent qualifications recognized by the Malaysian Government with minimum CGPA of 2.00 for Foundation/Matriculation/equivalent qualification, MUST have Either 1 of the following: a) Pass in Mathematics subject equivalent to SPM Additional Mathematics in the Foundation/Matriculation or other equivalent qualification, OR b) A credit in Additional Mathematics at SPM level/equivalent, OR c) A credit in Mathematics and any one of the Science, Technology or Engineering subject at SPM level/equivalent*

(*For category (c), candidates must take and pass Mathematics Enhancement Course (MEC) as a pre-requisite before they could proceed to take related core courses in this programme)

Career Prospects

- Data Analyst Engineer
- Programmer

- Software Developer
- Software Engineer
- Software Project Engineer
- System Analyst
- Web/Mobile Application Developer
- Artificial Intelligence (AI) Software Engineer

7.2.8 Recognition of Programme by MQA and Professional Bodies

Accreditation/Recognition Details	Validity Period
Multimedia Super Corridor (MSC) Status awarded UTAR Perak Campus for the following programmes: • Bachelor of Computer Science (Honours) (A7930) • Bachelor of Information Systems (Honours) Business Information Systems (A7931) • Bachelor of Information Systems (Honours) Information Systems Engineering (A7932) • Bachelor of Information Technology (Honours) Computer Engineering (A4841) • Bachelor of Information Technology (Honours) Communication and Networking (A6629)	Effective 11 January 2010
The Institute of Chartered Secretaries and Administrators (ICSA) awarded UTAR to be: 1. Eligible exemptions for MAICSA Professional Diploma in Corporate Administration (PDCA)	

2. To complete Professional Part 1 and 2 For the following programme: • Bachelor of Computer Science (Honours)	
Malaysia Board of Technologists (MBOT) has awarded UTAR with Privilege of Continuation of MQA Self Accreditation Status for MBOT Technology and Technical Program. (<i>Dianugerahkan Keistimewaan Penerusan Swaakreditasi MQA Programme Pengajian Teknologi & Teknikal Lembaga Teknologis Malaysia</i>): • Bachelor of Computer Science (Honours) • Bachelor of Information Systems (Honours) Business Information Systems • Bachelor of Information Systems (Honours) Information Systems Engineering • Bachelor of Information Technology (Honours) Computer Engineering • Bachelor of Information Technology (Honours) Communication and Networking	Until graduate cohort 2024

Faculty of Information and Communication Technology (FICT) was awarded the Premier Digital	Renewed till 2025
--	-------------------

Tech Institute (PDTI) status by the Malaysia Digital Economy Corporation (MDEC) in 2019.	
--	--

<https://dqa.utar.edu.my/MOE-MQA-Approvals--and--Accreditation.php>

<https://dqa.utar.edu.my/The-Institute-of-Chartered-Secretaries-and-Administrators--ICSA-.php>

7.3 Understanding Programme Structure

All of FICT's programmes are approved by Ministry of Education (MOE) before it is being conducted. All of FICT's programmes are also granted Malaysian Qualifications Agency (MQA) Provisional Accreditation when it is conducted. Having Provisional Accreditation means that the programme has met the minimum MQA requirements to start conducting the programme.

FICT is running an average of 120-124 credit hours degree programmes. Students are given a minimum of three years or up to a maximum of five years, in order to obtain all credit hours as offered by each degree programme. UTAR is having three intakes of students per year. In other words, we are having three trimesters per year. January/February and May/June trimesters are categorized as long trimesters with 20 weeks of study (including exam weeks), and October trimester is categorized as short trimester with only 13 weeks of study.

FICT has designed specific course structure for each intake of students. The programme structures for all FICT's programmes are revised into Flexible Structure. It is to give students the flexibility to make their own study plan. Students can arrange the subjects they are most interested to take first, as long as the subjects are offered. This also allows students to study at their own pace.

We adopt four different types of teaching approaches throughout the three years of study. We are lecturing students in lecture hall for most of the subjects in order to deliver course material illustrated with examples and applications. Students can join tutorial class to discuss and solve tutorial-based unit's problems. Lecturer and tutor will guide students through exercises based on course material. We also conduct practical labs for those practical-based units. Lecture and tutor will guide students through hands-on extended exercises and applications of course material. Besides, MOE had requested all degree programmes to integrate at least one trimester of industrial training into the programme structure. During the industrial training, students are placed under supervised industrial attachment with exposure to real-life working environment.

For every programme structure, we can categorize the courses into specialisation unit, core unit, elective unit, MPU unit and industrial training unit. Each unit will contribute different credit hours for the students once they passed the subjects. Students are required to accumulate enough credit hours as shown in their respective programme structure and obtained a minimum of CGPA above 2.0000 in order to graduate. Students are requested to pass all those courses under compulsory, core and industrial training modules. For the elective module, students have the choice to select the courses in the pool of courses as long as the course is offered for that particular trimester.

Another module needs to be highlighted here is the Final Year Project (FYP) to be taken by every student in order to be graduate. For a better preparation during the FYP which constitutes of two consecutive courses, “Project I” and “Project II”, all FICT’s programmes had integrated two courses to prepare the students for the above reason, namely “Inventive Problems Solving and Proposal Writing” and “Mini Project”. Students will be exposed to an innovative and creative problems solving technique, TRIZ, in the course “Inventive Problems Solving and Proposal Writing”. Besides, students can apply his/her ICT skill and knowledge in developing some small-scale projects in the course “Mini Project” as well. We hope students can obtain enough knowledge and experiences before proceed to their FYP.

Outcome-Based Education

MOE emphasizes a lot on the Outcome-Based Learning, and MQA has come out with 11 learning outcome clusters, namely

1. Knowledge and Understanding
2. Cognitive Skills
3. Practical Skills
4. Interpersonal skills
5. Communication Skills
6. Digital Skills

7. Numeracy Skills
8. Leadership, Autonomy and Responsibility
9. Personal Skills
10. Entrepreneurial Skills
11. Ethics and Professionalism

All FICT programmes approved by MOE must be developed based on the above 11 learning outcome clusters. The achievement of Malaysian Tertiary Education in terms of the above learning-outcome clusters will be measured by the public.

Methods of Outcome-Based Education (OBE) are student-centered learning methods that focus on empirically measuring student performance (the "outcome"). OBE implementations often incorporate a host of many progressive pedagogical models and ideas, such as reform mathematics, block scheduling, project-based learning and whole language reading, OBE in itself does not specify or require any particular style of teaching or learning. Instead, it requires the students to demonstrate what they have learned the required skills and content. However, in practice, OBE generally promotes curricula and assessment based on constructivist methods and discourages traditional education approaches based on direct instruction of facts and standard methods.

Each independent education agency specifies its own outcomes and its own methods of measuring student achievement according to those outcomes. In early 2013, UTAR had implemented an e-OBE system in monitoring and measuring the student achievement for the above 8 learning outcome domains. The results of these measurements can be used for different purposes. UTAR e-OBE System aims to measure programme and student programme outcome attainment, to be used as a tool to monitor student academic progress, and provide students self-assessment in their effort to achieve programme outcome.

There are 4 Programming Educational Outcome and 9 Programme Learning Outcome for each programme.

Bachelor of Information Systems (Honours) Information Systems Engineering

PEO1	Information systems engineering practitioners who possess constructive attitudes, a commitment to lifelong learning, research skills, and an entrepreneurial approach for self and career progression in the field of information.
PEO2	Information systems engineering practitioners who have effective communication skills, leadership skills, and act with autonomy and responsibility in their interactions with stakeholders.
PEO3	Information systems engineering practitioners who uphold ethical and professional practices in maintaining self and profession integrity.

PEO4	Information systems engineering practitioners who adopt appropriate methodologies and techniques to provide solutions for information systems problems based on relevant knowledge and technical skills in the field of information systems design and development in line with the industrial requirements.
-------------	--

PLO	Descriptions
PLO1	Apply digital and numeracy skills for solving problems in the field of information systems engineering.
PLO2	Apply effective skills of communication and interaction with stakeholders and society at large.
PLO3	Demonstrate leadership, teamwork, accountability and responsibility in delivering services related to the field of information systems engineering
PLO4	Apply analytical and critical thinking skills in providing solutions for information systems analysis, design, and development
PLO5	Demonstrate professionalism and take social and ethical considerations into account when delivering services related to the business and systems operations in the field of information systems engineering
PLO6	Apply a wide spectrum of business and real-world perspectives, principles of lifelong learning and digital entrepreneurship skills when providing solutions for emerging needs of the organizations

PLO	Descriptions
PLO7	Demonstrate essential knowledge of applicable facts, concepts, principles, and theories related to the understanding of requirements, and design and development of information systems
PLO8	Apply the theoretical principles of information systems related to the development, testing, ensuring conformance to the specifications, implementation and commissioning of functional software and information systems for businesses, government and organizations
PLO9	Adapt appropriate methodologies and techniques for planning, designing, developing and handling information systems to enhance organizational performance

Bachelor of Information Systems (Honours) Business Information Systems

PEO1	Business information systems practitioners who possess constructive attitudes, a commitment to lifelong learning and an entrepreneurial approach for self and career progression in the field of business information systems.
PEO2	Business information systems practitioners who have effective communication skills, leadership skills, and act with autonomy and responsibility in their interactions with stakeholders

PEO3	Business information systems practitioners who uphold ethical and professional practices in maintaining self and profession integrity
PEO4	Business information systems practitioners who adopt appropriate methodologies and techniques to manage information systems and provide solutions to enterprises in line with the industry requirements

PLO	Descriptions
PLO1	Apply digital and numeracy skills for solving problems in the field of business information system
PLO2	Apply effective skills of communication and interaction with stakeholders and society at large
PLO3	Demonstrate leadership, teamwork, accountability and responsibility in delivering services related to the field of business information systems
PLO4	Apply analytical and critical thinking skills in providing business solutions and management of information systems
PLO5	Demonstrate professionalism with social and ethical considerations in delivering services related to the business information systems and enterprise systems

PLO	Descriptions
PLO6	Apply varied business and real-world perspectives, principles of lifelong learning and digital entrepreneurship skills when providing solutions for emerging needs of the businesses, government and organizations
PLO7	Demonstrate essential knowledge of facts, concepts, principles and theories in the operations and management of business information systems
PLO8	Apply the theoretical principles of information systems in the collection, organization, storage, management and communication of information providing business and enterprise solutions
PLO9	Adapt appropriate methodologies and techniques for planning, designing, implementing, integration and management of business information systems and enterprise systems

Bachelor of Information Systems (Honours) Digital Economy Technology

PEO1	Digital economy technologists who possess constructive attitudes, a commitment to lifelong learning and digital entrepreneurial approach for self and career progression in the field of digital economy
PEO2	Digital economy technologists who have effective communication skills, leadership skills, and act with autonomy and responsibility in their interactions with stakeholders

PEO3	Digital economy technologists who uphold ethical and professional practices in maintaining self and profession integrity
PEO4	Digital economy technologists who adopt appropriate methodologies and techniques to manage and provide solutions to the digital economy technology in line with the industry requirements

PLO	Descriptions
PLO1	Apply digital and numeracy skills for solving problems in the field of digital economy
PLO2	Apply effective skills of communication and interaction with stakeholders and society at large
PLO3	Demonstrate leadership, teamwork, accountability and responsibility in delivering services related to the field of digital economy
PLO4	Apply analytical and critical thinking skills in providing digital economy solutions
PLO5	Demonstrate professionalism with social and ethical considerations in delivering services related to the digital economy
PLO6	Apply varied business and real-world perspectives, principles of lifelong learning and digital entrepreneurship skills when providing solutions

PLO	Descriptions
PLO7	Demonstrate essential knowledge of facts, concepts, principles and theories in the operations and management of digital economy
PLO8	Analyze the theoretical principles of information systems in managing business information for digital economy solutions
PLO9	Adapt appropriate methodologies and techniques for planning, designing, implementing, integrating and managing digital economy infrastructures

Bachelor of Information Technology (Honours) Communications and Networking

PEO1	Computing practitioners in Communications and Networking capable of adopting appropriate methodologies and techniques based on relevant knowledge and technical skills to design and develop solutions in line with the industry requirements.
PEO2	Computing practitioners having autonomy, responsibility, leadership and interpersonal skills to communicate effectively with discipline-related stakeholders.
PEO3	Computing practitioners having commitment for lifelong learning, research and an entrepreneurial mind-set for business and career progression.

PEO4	Computing practitioners who uphold ethical practices and professional integrity while supporting good governance.
-------------	---

PLO	Descriptions
PLO1	Utilise digital and numeracy skills for problem-solving in information technology management.
PLO2	Communicate and interact effectively with diverse stakeholders.
PLO3	Demonstrate teamwork, leadership, accountability, autonomy, and responsibility.
PLO4	Apply analytical and critical thinking skills to design, setup, administer, and configure different types of networks.
PLO5	Uphold professional practices, legal principles, ethics, cultural and social values in software development practices.
PLO6	Relate the importance of technopreneurship, managerial skills, economics, human relations, time-to-market, broad business and real-world perspectives to engage in further knowledge acquisition for continuous improvement.
PLO7	Demonstrate essential knowledge in software development, mathematical modelling and simulation analysis to evaluate the performance of network systems.

PLO	Descriptions
PLO8	Apply theoretical principles to develop computer programmes and application systems to support user-specified communication services.
PLO9	Adapt appropriate methodologies, techniques and technical skills for proposing, designing, implementing and managing Information Technology solutions and resources.

Bachelor of Information Technology (Honours) Computer Engineering

PEO1	Computing practitioners who apply appropriate methodologies and techniques in the design, testing, implementation, maintenance, service and sales of computer and ubiquitous systems.
PEO2	Computing practitioners who perform managerial tasks with good leadership, autonomy, responsible and communicate effectively at work.
PEO3	Computing practitioners who are committed to lifelong learning and knowledge sharing in the field of Computer Engineering.
PEO4	Computing practitioners who apply computing technology and knowledge to set up and support the various aspects (maintenance, logistics, service, sales and marketing) of a business with good professional and ethical practices.

PLO	Descriptions
PLO1	Use digital technologies and numeracy skills for information sourcing, data processing and problem solving at work.
PLO2	Demonstrate effective interpersonal and communication skills in report writing and interactive presentation to various groups of audience.
PLO3	Relate the importance of managerial skills to address practical issues in teamwork, leadership, accountability, autonomy and responsibility.
PLO4	Apply analytical, critical thinking and problem solving skills for research and development work in the areas of ubiquitous computing for IT.
PLO5	Uphold professional practices, legal principles, ethics, culture and social values.
PLO6	Relate the importance of practical issues such as entrepreneurship, economics, human relation factors, time-to-market, broad business and real world perspectives and apply these factors in the practice of ubiquitous computing development for IT.
PLO7	Demonstrate essential knowledge, concepts, principles and theories related to computer technology and communication, embedded system design, intelligent systems, signal and image processing.

PLO	Descriptions
PLO8	Apply theoretical principles of IT for the development of embedded computing systems to design, implement and manage the ubiquitous computing solutions and resources to support IT development.
PLO9	Adapt appropriate methodologies and techniques for proposing, designing, implementing and managing software computing solutions and IT resources.

Bachelor of Information Technology (Honours) Industrial Intelligent Systems

PEO1	Computing practitioners who are capable to apply appropriate methodologies and techniques to provide computing solutions based on knowledge and technical skills in the technological system in line with the industry requirements.
PEO2	Computing practitioners who are capable of working autonomously, responsible, have leadership skills and possesses good interpersonal skills to communicate effectively with relevant stakeholders.
PEO3	Computing practitioners who are committed to lifelong learning in developing both the personal and entrepreneurial competencies.

PEO4	Computing practitioners who are adhering to ethical practices and profession integrity while supporting good governance.
-------------	--

PLO	Descriptions
PLO1	Utilise digital and numeracy skills for problem solving in the industrial technological system.
PLO2	Communicate and interact effectively with diverse stakeholders.
PLO3	Demonstrate leadership, teamwork, accountability and responsibility at work.
PLO4	Demonstrate analytical, critical thinking and problem-solving skills in managing and resolving problems related to industrial intelligent system.
PLO5	Uphold professional practices, legal principles, ethics, and positive cultural and social values.
PLO6	Relate the importance of life-long learning, entrepreneurship, managerial skills, human factors, time-to-market, broad business and real-world perspectives to personal development and technological progression.
PLO7	Demonstrate technical knowledge of essential facts, concepts, principles, and theories in industrial intelligent system.

PLO	Descriptions
PLO8	Apply a range of theoretical principles and approaches in Information Technology to support the industrial intelligent system.
PLO9	Adapt appropriate methodologies and techniques for proposing, designing, implementing and managing Information Technology solutions and resources.

Bachelor of Computer Science (Honours)

PEO1	Computing practitioners who possess positive attitudes, commitment for lifelong learning and entrepreneurial mind-set within industry for self and career progression in the field of Computing.
PEO2	Computing practitioners having effective discipline-related communication skills, leadership skills, autonomy and responsibilities in the discipline of Computing.
PEO3	Computing practitioners who uphold ethical and professional practices in maintaining self and profession integrity.
PEO4	Computing practitioners who are able to adopt appropriate methodologies and techniques to provide computing solutions based on relevant knowledge and technical skills in the Computing field in line with the industry requirements.

PLO	Descriptions
PLO1	Utilise digital and numeracy skills for problem solving in the field of Computing.
PLO2	Apply effective soft skills in communication and interaction with diverse stakeholders and society at large.
PLO3	Demonstrate leadership, teamwork, accountability and responsibility in delivering services related to field of computing.
PLO4	Apply analytical, critical thinking and problem solving skills in management and development of various forms of computer application systems.
PLO5	Demonstrate professionalism from the social, economic and ethical perspectives in delivering related services in the field of computing.
PLO6	Apply entrepreneurial skill and commit to principle of lifelong learning from the business and real-world perspectives, research and development (R&D) and in the field of computing.
PLO7	Analyse knowledge and skills to relate essential facts, mathematics, concepts, principles and theories in solving computing problems.
PLO8	Analyse algorithms and techniques to design and optimize computing solutions.
PLO9	Adapt appropriate computing methodologies, techniques and algorithms in analyzing, modeling, designing, developing, programming and evaluating efficient computing solutions.

7.4 Info about Faculty and Elective Courses

The faculty and elective courses are based on the seven programmes offered by FICT, namely Bachelor of Information Technology (Honours) Computer Engineering (CT), Bachelor of Information Technology (Honours) Communication and Networking (CN), Bachelor of Information Technology (Honours) Industrial Intelligent Systems (IR), Bachelor of Computer Science (Honours) (CS), Bachelor of Information System (Honours) Information Systems Engineering (IA), Bachelor of Information System (Honours) Business Information System (IB), Bachelor of Information Systems (Honours) Digital Economy Technology (DE). Bear in mind that the module list is subjected to change from time to time.

BACHELOR OF INFORMATION SYSTEMS (HONOURS) INFORMATION SYSTEMS ENGINEERING

Course Code	Core Modules	Pre-requisite
UCCA2103	Management Information Systems	-
UCCM2433	Fundamentals of Statistics	-
UCCD1004	Programming Concepts and Practices	-
UCCD1133	Introduction to Computer Organisation and Architecture	-
UCCT1013	Introduction to Information Systems Design	-
UCCD1203	Database Development and Applications	-

UCCD1024	Data Structure and Algorithmic Problem Solving	UCCD1004 Programming Concepts and Practices
UCCN1004	Data Communications and Networking	-
UCCD2003	Object-Oriented Systems Analysis and Design	-
UCCD2044	Object-Oriented Programming Practices	UCCD1004 Programming Concepts and Practices
UCCD2043	Information Technology Project Management	-
UCCD2213	Software Engineering Principles	-
UCCD2103	Operating Systems	-

Course Code	Specialization	Pre-requisite
UCCD2303	Database Technology	UCCD1203 Database Development and Applications
UCCD3223	Mobile Applications Development	UCCD2044 Object-Oriented Programming Practices; or UCCD2014 Object-Oriented Concepts and Programming
UCCA2513	Mini Project	Earned at least 54 credit hours (any subjects)

UCCN1223	Cybersecurity	-
UCCD2323	Front-End Web Development	UCCD1004 Programming Concepts and Practices
UCCD2502	Introduction to Inventive Problem Solving and Proposal Writing	Earned at least 54 credit hours (any subjects)
UCCD3023	Digital Entrepreneurship	-

Course Code	Final Year Project	Pre-requisite
UCCA3583	Project I	UCCD2502 Introduction to Inventive Problem Solving and Proposal Writing, Earned at least 75 credit hours (any subjects)
UCCA3596	Project II	UCCA3583 Project I

Course Code	Industrial Training	Pre-requisite
UCCA2596	Industrial Training	Earned at least 54 credit hours (any subjects) and have obtained GPA & CGPA of 2.00 or above during the placement trimester (one trimester before internship trimester)

Course Code	Free Modules (Elective) (Choose 3 courses)	Pre-requisite
UALE1083	Basic Professional Writing	-
UAMG1043	Interpersonal Communication	-
UBMM1013	Management Principles	-
UBMM2013	Operations Management	-
UBMH1013	Organisational and Human Resource	-
UBMM2023	Organisational Behaviour	-
UBTM1013	Principles of Marketing	-

Course Code	Field Electives (Choose 3 courses)	Pre-requisite
UCCA3053	Knowledge Management	-
UCCD3013	eCommerce Practices	-
UCCN2243	Internetworking Principles and Practices	UCCN1004 Data Communications and Networking
UCCM1363	Discrete Mathematics	-
UCCD1213	Fundamentals of Digital Media Technology	-
UCCD2063	Artificial Intelligence Techniques	UCCD1024 Data Structure and Algorithmic Problem Solving

UCCM1153	Introduction to Calculus and Applications	-
UCCD2123	User Experience Design	-
UCCD3253	Enterprise Systems	UCCB1013 Fundamentals of Business Systems
UCCD2233	Information Technology in Customer Relationship Management	UCCB1013 Fundamentals of Business Systems
UCCB2333	Social Media Strategies for Business	-
UCCB3113	Information Technology Control and Audit	-
UCCB1223	Rapid Application Development	UCCD1004 Programming Concepts and Practices
UCCB1013	Fundamentals of Business Systems	

Course Code	Field Electives - Option 1 (Choose 1 course)	Pre-requisite
UCCD3243	Server-Side Web Applications Development	UCCD2223 Web Site Design and Development
UCCD3343	Big Data Analytics	UCCD1203 Database Development and Applications
UCCD2083	Cloud Computing and Services	-

Course Code	Field Electives - Option 2 (Choose 1 course)	Pre-requisite
UCCA3224	Web Applications and Technologies	UCCD2323 Front-End Web Development UCCD2044 Object Oriented Programming Practices
UCCA3234	Database Administration	UCCD2303 Database Technology
UCCD3084	Graphics Programming for Extended Reality	UCD2044 Object-Oriented Programming Practices
UCCB3224	Data Mining Techniques	UCCD1203 Database Development and Applications
UCCT3144	Blockchain and Business Models	-

Course Code	MPU Courses	Pre-requisite
MPU3182/ MPU3142	Falsafah dan Isu Semasa (for local students) / Bahasa Melayu Komunikasi 2 (for international students)	-

MPU3152/ MPU3192	Penghayatan Etika dan Peradaban (for local students) / Philosophy and Current Issues (for international students)	-
MPU3202	Integrity and Anti-Corruption	-

Course Code	University Compulsory	Pre-requisite
MPU33013	Malaysian Economy	-
MPU32143	English for Information Technology	-

Course Code	University Elective	Pre-requisite
MPU34xx2	Co-curriculum	-
MPU34182	Massive Open Online Courses (MOOC)	-

Course Code	Free Modules	Pre-requisite
MPU32013 / UALxxx3	Bahasa Kebangsaan (A)* / Foreign Language*	-
UBMM1011	Sun Zi's Art of War and Business Strategies	-
UCCD3053	Information Technology Professional Ethics	-

BACHELOR OF INFORMATION SYSTEMS (HONOURS) BUSINESS INFORMATION SYSTEMS

Course Code	Core Modules	Pre-requisite
UCCT1013	Introduction to Information Systems Design	-
UCCD1203	Database Development and Applications	-
UCCB1104	Introduction to Business Programming	-
UCCN1004	Data Communications and Networking	-
UCCB3133	Business Analytics	UCCD1143 Probability and Statistics for Computing UCCM2433 Fundamentals of Statistics
UCCD2044	Object-Oriented Programming Practices	UCCD1004 Programming Concepts and Practices
UCCD1004	Programming Concepts and Practices	-
UCCD2043	Information Technology Project Management	-
UCCD2323	Front-End Web Development	UCCD1004 Programming Concepts and Practices

UCCD1133	Introduction to Computer Organisation and Architecture	-
UCCT1113	Information Technology Infrastructure for Business	UCCN1004 Data Communications and Networking
UCCD2303	Database Technology	UCCD1203 Database Development and Applications
UCCB1013	Fundamentals of Business Systems	-
UCCN1223	Cybersecurity	-
UCCB3353	Artificial Intelligence for Business	UCCB3133 Business Analytics
UCCD3053	Information Technology Professional Ethics	-
UCCT2183	Digital Technology for Business Models	UCCB1013 Fundamentals of Business Systems

Course Code	Specialization Modules	Pre-requisite
UCCD3013	eCommerce Practices	-
UCCD2502	Introduction to Inventive Problem Solving and Proposal Writing	Earned at least 54 credit hours (any subjects)
UCCB2513	Mini Project	Earned at least 54 credit hours (any subjects)

UCCD3023	Digital Entrepreneurship	-
UCCM2433	Fundamentals of Statistics	-

Course Code	Final Year Project	Pre-requisite
UCCB3583	Project I	UCCD2502 Introduction to Inventive Problem Solving and Proposal Writing, Earned at least 75 credit hours (any subjects)
UCCB3596	Project II	UCCB3583 Project I

Course Code	Industrial Training	Pre-requisite
UCCB2596	Industrial Training	Earned at least 54 credit hours (any subjects) and have obtained GPA & CGPA of 2.00 or above during the placement trimester (one trimester before internship trimester)

Course Code	Field Electives - Option 1 (Choose 1 course)	Pre-requisite
UCCB2333	Social Media Strategies for Business	-

UCCD3343	Big Data Analytics	UCCD1203 Database Development and Applications
UCCA2103	Management Information Systems	
UCCT2153	Digital Supply Chain Management	UCCB1013 Fundamentals of Business Systems

Course Code	Field Electives - Option 2 (Choose 1 course)	Pre-requisite
UCCB3104	Business Intelligence Information Systems	UCCD1203 Database Development and Applications
UCCB3144	Advanced Digital Media Technology	UCCD1213 Fundamentals of Digital Media Technology
UCCB3224	Data Mining Techniques	UCCD1203 Database Development and Application
UCCT3124	Digital Marketing	-

Course Code	Free Modules (Elective) (Choose 2 courses)	Pre-requisite
UBMH1013	Organization and Human Resource	-
UBMM1013	Management Principles	-
UBMM2013	Operations Management	-
UBTM1013	Principles of Marketing	-
UBAF1043	Business Accounting	-

Course Code	Field Electives (Choose 3 courses)	Pre-requisite
UCCD3253	Enterprise Systems	UCCB1013 Fundamentals of Business Systems
UCCD2233	Information Technology in Customer Relationship Management	UCCB1013 Fundamentals of Business Systems
UCCD2123	User Experience Design	-
UCCB3113	Information Technology Control and Audit	-
UCCM1153	Introduction to Calculus and Applications	-
UCCD3223	Mobile Applications Development	UCCD2044 Object-Oriented Programming Practices; or UCCC2014 Object-Oriented Concepts and Programming
UCCB1223	Rapid Application Development	UCCD1004 Programming Concepts and Practices
UCCD2213	Software Engineering Principles	-
UCCD3243	Server-Side Web Applications Development	UCCD2323 Front-End Web Development
UCCA3053	Knowledge Management	-
UCCT2103	Financial Technology	-
UCCT2163	Payment Technology	UCCT2103 Financial Technology

UCCD1213	Fundamentals of Digital Media Technology	-

**BACHELOR OF INFORMATION TECHNOLOGY (HONOURS)
COMMUNICATIONS AND NETWORKING**

Course Code	Core Modules	Pre-requisite
-------------	--------------	---------------

UCCD1143	Probability and Statistics for Computing	-
UCCM1363	Discrete Mathematics	-
UCCN1223	Cybersecurity	-
UCCN1004	Data Communications and Networking	-
UCCD1004	Programming Concepts and Practices	-
UCCD1024	Data Structure and Algorithmic Problem Solving	UCCD1004 Programming Concepts and Practices
UCCD1133	Introduction to Computer Organisation and Architecture	-
UCCD1203	Database Development and Applications	-
UCCD2044	Object-Oriented Programming Practices	UCCD1004 Programming Concepts and Practices
UCCD2323	Front-End Web Development	UCCD1004 Programming Concepts and Practices
UCCD2123	User Experience Design	-
UCCD2043	Information Technology Project Management	-
UCCD3053	Information Technology Professional Ethics	-
UCCT1013	Introduction to Information Systems Design	-

Course Code	Specialization	Pre-requisite
UCCN2243	Internetworking Principles and Practices	UCCN1004 Data Communications and Networking
UCCN2013	Network Switching and Routing	UCCN2243 Internetworking Principles and Practices
UCCD2103	Operating Systems	-
UCCN2023	Fundamentals of Wireless Communications	-
UCCN2233	Computer System and Network Security	UCCN1223 Cybersecurity
UCCN2513	Mini Project	Earned at least 54 credit hours (any courses)

Course Code	Field Electives 2 / ICT Electives (Choose 2 courses)	Pre-requisite
UCCB1013	Fundamentals of Business Systems	-
UCCD2063	Artificial Intelligence Techniques	UCCD1024 Data Structure and Algorithmic Problem Solving
UCCD3223	Mobile Applications Development	UCCD2044 Object-Oriented Programming Practices
UCCD3243	Server-Side Web Application Development	UCCD2323 Front-End Web Development

UCCD2083	Cloud Computing and Services	-
UCCN2213	Teletraffic Engineering	UCCD1143 Probability and Statistics for Computing
UCCN2053	Optical Switching and Networking	UCCN1004 Data Communications and Networking
UCCD2213	Software Engineering Principles	-

Course Code	Field Electives 1 / CN Electives (Choose 3 courses)	Pre-requisite
UCCN3004	Server Management and Administration	-
UCCN3014	Multimedia Networking and Real-Time Transmission	UCCN2243 Internetworking Principles and Practices
UCCN3024	Wireless and Mobile Networking	UCCN2023 Fundamentals for Wireless Communications
UCCN3034	Network Programming	UCCD1024 Data Structure and Algorithmic Problem Solving

UCCN3044	Network and Switch Simulation	UCCD1024 Data Structure and Algorithmic Problem Solving, UCCN1004 Data Communications and Networking
UCCN3054	Wireless Security	UCCN1223 Cybersecurity, UCCN2023 Fundamentals of Wireless Communications
UCCN3064	Embedded Network Devices	UCCD2044 Object-Oriented Programming Practices
UCCD3084	Graphics Programming for Extended Reality	UCCD2044 Object-Oriented Programming Practices
UCCD3064	Software Testing	UCCD2213 Software Engineering Principles
UCCN3084	Ethical Hacking and Digital Forensics	UCCN1223 Cybersecurity

Course Code	Final Year Project	Pre-requisite
UCCN3583	Project I	UCCD2502 Introduction to Inventive Problem Solving and Proposal Writing, Earned at least 75 credit hours (any courses)
UCCN3596	Project II	UCCN3583 Project I

Course Code	Industrial Training	Pre-requisite
UCCN2506	Industrial Training	Earned at least 54 credit hours (any courses) and have obtained GPA & CGPA of 2.0000 or above during the placement trimester (one trimester before internship trimester)

Course Code	Free Modules	Pre-requisite
MPU32013/ UALxxx3	Bahasa Kebangsaan (A)* / Foreign Language	-
UBMM1011	Sun Zi's Art of War and Business Strategies	-
UCCD3023	Digital Entrepreneurship	-
UCCD2502	Introduction to Inventive Problem Solving and Proposal Writing	Earned at least 54 credit hours (any courses)

Course Code	Free Modules Electives (Choose 1 course)	Pre-requisite
UALL1053	Critical Reading and Thinking	-
UALE1083	Basic Professional Writing	-
UAMG1043	Interpersonal Communication	-

Course Code	MPU	Pre-requisite
MPU3152 / MU3192	Penghayatan Etika dan Peradaban (for local students) / Philosophy and Current Issues (for International students) – MPU1	-
MPU3182 / MPU3142	Falsafah dan Isu Semasa (for local students) / Bahasa Melayu Komunikasi 2 (for international students) – MPU1	-
MPU3202	Integrity and Anti-Corruption – MPU4	-
MPU32143	English for Information Technology – MPU2	-
MPU33013	Malaysian Economy – MPU3	-

Course Code	University Elective	Pre-requisite
MPU34xx2	Co-curriculum	-
MPU34182	Massive Open Online Courses (MOOC)	-

BACHELOR OF INFORMATION TECHNOLOGY (HONOURS) COMPUTER ENGINEERING

Course code	Core Modules	Pre-requisite
UCCM1353	Basic Algebra	-

UCCM1153	Introduction to Calculus and Applications	-
UCCD1143	Probability and Statistics for Computing	-
UCCD1004	Programming Concepts and Practices	-
UCCD1024	Data Structure and Algorithmic Problem Solving	UCCD1004 Programming Concepts and Practices
UCCD1203	Database Development and Applications	-
UCCD2043	Information Technology Project Management	-
UCCN1004	Data Communications and Networking	-
UCCD2323	Front-End Web Development	UCCD1004 Programming Concepts and Practices
UCCN1223	Cybersecurity	-
UCCD2123	User Experience Design	-
UCCD3053	Information Technology Professional Ethics	-
UCCE2053	Computer Organisation and Architecture	UCCE2023 Digital Systems Design

Course code	Specialization	Pre-requisite
UCCE1024	Circuit Theory and Basic Electronics	-

UCCE1023	Digital Fundamentals	-
UCCE1083	Electronic Devices and Applications	UCCE1024 Circuit Theory and Basic Electronics
UCCD2003	Object-Oriented Systems Analysis and Design	UCCD1004 Programming Concepts and Practices
UCCE1064	Processor and Interfacing	UCCE1023 Digital Fundamentals
UCCE2073	Introduction to Digital Signal Processing	UCCM1153 Introduction to Calculus and Applications
UCCE2023	Digital Systems Design	UCCE1023 Digital Fundamentals
UCCE3033	Embedded Systems Design	UCCE1053 Processor and Interfacing
UCCD2103	Operating Systems	-
UCCE2513	Mini Project	Earned at least 54 credit hours (any subjects)

Course code	Field Electives (Choose 3 courses)	Pre-requisite
UCCC2063	Algorithm Analysis	UCCD1024 Data Structure and Algorithmic Problem Solving
UCCN2023	Fundamentals of Wireless Communications	-

UCCN2243	Internetworking Principles and Practices	UCCN1004 Data Communications and Networking
UCCE2093	Computational Intelligence	UCCD1004 Programming Concepts and Practices
UCCE3083	Embedded Architecture and Computing	UCCD2103 Operating Systems
UCCE3073	Computer Vision and Image Processing	UCCD1004 Programming Concepts and Practices
UCCE3123	Advanced Computer Architecture	UCCE2023 Digital Systems Design
UCCE3133	Electronic Testing Principles	UCCE1083 Electronic Devices and Applications

Course code	Final Year Project	Pre-requisite
UCCE3503	Project I	UCCD2502 Introduction to Inventive Problem Solving and Proposal Writing, Earned at least 75 credit hours (any subjects)
UCCE3506	Project II	UCCE3503 Project I

Course code	Industrial Training	Pre-requisite
UCCE2506	Industrial Training	Earned at least 54 credit hours (any subjects) and have obtained GPA & CGPA of 2.00 or above during the placement

		trimester (one trimester before internship trimester)

7.5 Info about Final Year Project/Industrial Training

7.5.1 General Information Regarding Final Year Project

Every student undertaking the degree is required to complete a project under the supervision of a FICT academic staff or an external supervisor from the industry. In the case whereby an external supervisor is appointed, an FICT staff shall be appointed as a co-supervisor for the student. The project should provide students with the opportunity to bring together the academic knowledge and skills acquired from the range of modules already studied.

In general, the whole project can be divided into three parts, namely **Introduction to Inventive Problem Solving and Proposal Writing, Project I** and **Project II**, which are to be completed by the students in the third trimester of Year 2 and first and second trimesters in Year 3.

Students are required to propose/select topic and supervisor within the first 6 weeks of **Introduction to Inventive Problem Solving and Proposal**

Writing and shall continue with the same topic in **Project I** and **Project II**. Changing topic during the study is allowed but are not encouraged and subjected with strong reason(s).

Students are required to submit their report to Turnitin (www.turnitin.com) for plagiarism checking. An account is created for student who takes **Introduction to Inventive Problem Solving and Proposal Writing**.

Information regarding the FYP topic and research area for each lecturer, schedule as well as guide book can be found in:

<https://fypfict.utar.edu.my/>

Planned Schedule for IIPSPW, FYP1 and FYP2

January 2021

Session 2020/2021

Note: Students who fail to submit their full reports and/or fail to perform a presentation will be graded 'F'.

FYP Report with unsatisfactory Turnitin scores will not be accepted.

Table 1: Planned Schedule for Inventive Problem Solving and Proposal Writing, IIPSPW

IIPSPW		
Activities	Time/Deadline	Action Required By
Meeting to discuss the process of the Project, TRIZ	Week 1 – Week 14	2 hours lecture for 14 weeks
Fill up FYP Undertaking online form	Week 6	Student, Supervisor (Late submission WILL NOT be accepted.)
Assignment of students (without supervisors) to supervisors	Week 6	FYP Committee
Weekly log	Weekly (week 6 and onwards)	Student, Supervisor

Submit ONE (1) tape-bound Preliminary Proposal Report to the IIPSPW lecturer for marking. No plastic cover and CD are required for IIPSPW. Use double sided printing.	Week 12	Student, Supervisor, Lecturer
Oral presentation (Assessed by the Supervisor)	Week 13-14 (Supervisor arranges your own convenient time.)	Student, Supervisor
Submission of marks	Week 15	Supervisor, FGO

Table 2: Planned Schedule for Final Year Project 1 (who had taken IIPSPW)

Project 1		
Activities	Time/Deadline	Action Required By
Meeting with supervisor, Weekly log	Weekly	Student, Supervisor
Student submits softcopy of the draft Project 1 report (proposal) without the preliminary work section to Supervisor.	Week 9	Student, Supervisor
Supervisor feedbacks to student of the draft report if there is any. Student checks with supervisor of the feedbacks during weekly meeting.	Week 9 onwards	Student, Supervisor
Student explores project preliminary work to produce results to add (i.e. strengthen) to the final Project 1 report.	Week 9-12 Student can work beyond week 12 to strengthen your preliminary work.	Student, Supervisor

Student submits TWO (2) comb-bound final Project 1 reports (proposals) and the softcopy of report to Supervisor. You must follow the submission procedure shown at end of this document. Four marks will be deducted for all late submission. No plastic cover and CD are required for FYP1. Use double sided printing. (Proposal marked by Supervisor Only) Moderator reads and gives feedback (if there is any) of the submitted report before or during oral presentation.	Week 12	Student, Supervisor, Moderator, lab Managers
Oral presentation (with Prototype or preliminary work done) (Assessed by Supervisor and Moderator)	Week 13-14 Check with your supervisor for the exact date and time.	Student, Supervisor, Moderator (Student is required to be in the venue for exactly 2 hours to demonstrate your work to visitors. This

		is a simulation / exposure of the poster session experience.)
Submission of FYP marks by supervisors	Week 15	Supervisor, Moderator
Supervisor to submit ONE (1) set of hardcopy FYP report to the FYP lab.	Week 15	Supervisors

Table 3: Planned Schedule for Final Year Project 2

Project 2		
Activities	Time/Deadline	Action Required By
Meeting with supervisor, Weekly log	Weekly	Student, Supervisor
Submit draft reports to the supervisor	Week 6 to week 10	Student, Supervisor
Supervisor feedbacks to student of the draft report if there is any. Student checks with supervisor of the feedbacks during weekly meeting.	After report submission	Student, Supervisor
Supervisor to submit nominees for FYP competition	Week 12 Friday, 5pm	Supervisor
Submit TWO (2) corrected comb-bound full report copies, the softcopy of report and A1 size of PowerPoint poster in softcopy to Supervisor. The student must	Week 13	Student, Supervisor, Moderator, lab Managers

follow the submission procedure shown at end of this document. Four marks will be deducted for all late submission.		
Moderator reads and gives feedback (if there is any) of the submitted report before or during oral presentation.		
Oral Presentation, Poster Submission and Product Demonstration (including FYP competition)	Week 13-14 Check with your supervisor for the exact date and time.	Student, Supervisor, Moderator, FYP Committee (Student is required to be in the venue for exactly 2 hours to demonstrate your work to visitors. This is a simulation / exposure of the poster session experience.)
Submission of FYP marks by supervisors	Week 15	Supervisor, Moderator, FGO (make sure the supervisor and moderator submit on time)

Students to submit TWO (2) softcopies in CD/DVD to the FGO. (include the poster and codes (if applicable) in the softcopy) Supervisor to submit ONE (1) set of hardcopy FYP report to the FYP lab.	Week 15	Supervisors, Students, FGO (make sure the student sign when they submit the CD/DVD)
--	----------------	--

FYP Report Submission Procedure

for Students, Supervisors and Lab Managers

7.5.2 Industrial Training Guidelines

Students who are planning to go for industrial training need to pre-register 1 semester in advance. Please read the following information on the industrial training and pre-registration process:

1. Students who intend to undertake industrial training next semester should begin the pre-registration process in week 2 of the current semester. (i.e. 1 semester before the actual industrial training).
2. Please note that you need to FULFILL the entire duration of the internship period as indicated in the FICT Industrial Training Portal.
3. Please refer to the pre-registration process below.

The whole industrial training process takes 2 semesters:

- 1 semester for pre-registration and looking for jobs.
- 1 semester for the actual industrial training.

Students who are under probation during the pre-registration semester are NOT allowed to go for industrial training. For example, a student intends to go for industrial training in the Oct 2011 semester. He is required to pre-register and look for internship job in the May 2011 semester. However, in the May 2011 semester, this student is under probation due

to poor academic results (GPA < 2.0) in the Jan 2011 semester. Hence, this student is NOT eligible to go for industrial training in the Oct 2011.

Download resources:

Please refer to <https://fict.utar.edu.my/> and visit the industrial training page for forms and appendix.

Pre-Registration Process

1. Things you need to know before registration

- a. You have to start the pre-register process one semester before the actual industrial training semester.
- b. For example, if you plan to go for your industrial training in the Oct 2011 semester, you need to start the pre-registration process in the May 2011 semester.
- c. The whole pre-registration process will take one semester, and there are four stages in the process:
 - Looking for internship job placement
 - Interview & acceptance of job placement
 - Submission of internship documents
 - Preparation to go out

2. Submission of FICT Pre-registration form.

- a. Eligibility of industrial training:
 - Accumulated 54 credits including transferred credits from other institution.
 - Accumulated 45 credits excluding current semester.

- Advisable to go for industrial training AFTER year 2 trimester 2.
 - Not under probation status during the pre-registration semester.
 - CGPA $\geq$ 2.0
- b. Fill in the pre-registration form in FICT Industrial Training Portal.
 - c. Please refer to WBLE for the submission guidelines.
 - before week 15 of long semester (Jan and May semester)
 - before week 8 of short semester (Oct semester)
 - You MUST fill in and submit the pre-registration form if you intend to go for industrial training.
 - Faculty officers will pre-register the students into the computer system based on this form.
 - d. In this stage:
 - DO NOT submit your pre-registration form in last minutes or after your final exam. FICT reserves the right to deny your industrial training if you perform the above act.
 - DO NOT go for industrial training "quietly" without pre-registration. This is your part-time job, not industrial training.
 - All students MUST fulfill the whole duration of the industrial training dates posted by FICT. About 19 weeks in long semesters, 3 full months in short semester.
 - Any student tries to deviate from the posted dates, OR "create" their own date (less than 19 weeks or 3 months), without seeking approval from the faculty will result in failure.

- DO NOT compare the posted period of industrial training and procedure with other faculties.
- FICT reserves the rights to deny students from going to Industrial Training if the particular students do not fulfill the conditions to go for industrial training.

3. Looking for Internship job placement

Form: Request for Supporting Letter for Industrial Training

(Company may require you to prove that you are a UTAR student looking for internship placement. Submit this form to FICT to obtain this supporting letter, 3 business days to process).

(Some company may request this supporting letter after your first day of internship, to be filed as a legal document in human resource dept. Submit the same form to FICT.)

Sample of the supporting letter without FICT letterhead

a. Valid job placements:

- Any IT technical job, e.g: Programming, Database, Linux, Web page, Server, PC technical support, Networking, etc.
- No sales & marketing job, e.g: direct selling, selling handphone, selling PC, etc.

- If students are found that they are doing non-IT related job, this may lead to a failure in industrial training.

b. There are two ways to look for job.

- Self-placement (look for placement yourself)
- UTAR placement (UTAR assigned)

c. FICT highly encourage the students to learn to look for job placement themselves

- Jobstreet
- Industrial Training Portal
- WBLE (Industrial Training, Job Posting Link)

d. Send email and resume (sample) to potential employer.

- Indicate clearly your industrial training period (start date & end date) to your company when you apply for the placement.

e. Interview & acceptance of job placement.

- Be professional during the interview.
- Please accept the offer that you have promised to the company. DON'T promise one company and go to another company. This is a serious ethical issue.

- Advisable to accept the first job offer. If you have more than one internship offer at the same time, please accept one and inform other companies politely about your decline.
- Some companies may require you to prove that you are a UTAR student before interview or after interview. Kindly submit the follow form (Request for Supporting Letter for Industrial Training) to the FICT FGO and you will obtain a supporting (or verification) letter (sample). Submit or show this letter to the companies who request it.

4. Preparation to go out

Submit pre-registration form + academic transcript + company offer letter + 4 undertaking & indemnity letters + consent form.

PLEASE read your offer letter carefully, regarding your working hours and job scope!

Before you go out to industrial training, you are required to submit the following 8 documents:

- Pre-registration Form
- Academic Transcript
- Letter of offer (accepted and signed by you) from company
- Letter of Undertaking For UTAR By Student (download this, and put your signature on the letter)
- Letter of Undertaking For UTAR by Parents or Guardian (download this, and have the signature of your parents/guardian)
- Letter of Indemnity for Company by Student (download this, and put your signature on the letter)
- Letter of Indemnity For Company by Parents or Guardian (download this, and have the signature of your parents/guardian)
- Consent Form (download this from your WBLE)

If you do not submit any one of the above documents, FICT WILL NOT process and register your industrial training course!

- Please read your offer letter carefully. If there is any dispute with the company, the offer letter will be treated as "legal evidence".

5. Rules for Placement (Taken from Industrial Training Manual section 5.2.1)

For students who are under probation and still want to go for industrial training:

This is a SPECIAL grace procedure based on special circumstances, NOT an obligatory procedure for FICT. If you are under probation and you still want to go for industrial training, special approval may be given, especially to those who are in your last semester, please do the following:

- a. Submit the industrial training pre-registration, clearly indicates that you are a student under probation.
- b. Together with the pre-registration form, submit all other internship documents to FICT (please refer to WBLE for the submission guidelines).
- c. FICT will process your request in a case by case basis, and approve/disapprove your request based on the decision of the industrial training committee. Industrial training committee reserves the FULL right to approve/disapprove your request.
- d. Industrial training committee will inform student on the approval/disapproval of this special request after the semester results have been released.

For those who are under probation:

- a. You have to look for internship placement yourself. FICT WILL NOT help you to look for internship placement.
- b. FICT WILL NOT issues any supporting letter to you.

<https://fict.utar.edu.my/Before-Industrial-Training.php>

7.6 Info about WBLE, Lecture Plan, Attendance/Barring, Lecturer contact hours, Exams/Coursework, Credit Transfer

7.6.1 Web Based Learning Environment (Wble)

- 3 weeks before the new trimester start, the Wble Team (CSDS) will send out the email with template to all the academic staffs and FGO for compiling.
- Wble Team will start to create the Wble course creation / retain for the courses 2 weeks before the new trimester start.
- All lectures are required to upload their teaching contents / materials one week before the new trimester started.
- Wble Team Kampar has created 2 wble platforms. Please try to login to both platforms and check,
 - <https://ewble-kpr.utar.edu.my/login/index.php>
 - <https://wble-kpr.utar.edu.my/wble-kpr/login/index.php>.
- If you need further clarification please contact Wble Team as below:

Sungai Long Campus (wble@utar.edu.my)

Perak Campus (wblekpr@utar.edu.my)

7.6.2 Bar List

Student shall be barred from taking the Main Examination if:

- The student has less than 80% class attendance for a course in a trimester without acceptable reasons or without obtaining the prior approval of the Academic Staff concerned.
- Any student who is barred from taking the Main Examination for a course in a trimester shall be given zero marks for the course concerned.

In cases where prior permission could not be sought from the Academic Staff concerned for reasons such as sickness or the occurrence of an emergency, students are required to submit the medical certificate/supporting document to Faculty General Office (FGO) in 3 working days.

Late submission of Medical certification will not be considered. Each Academic Staff shall be responsible for taking attendance for the lectures, tutorials and practical classes, which are his to conduct.

7.6.3 Programme Transfer

- RM20.00 programme transfer processing fees.
- RM200.00 programme transfer fees (For Successful Application).

7.6.3.1 For New student

1. Firstly, have paid the full fees and registered as a student of the University in the programme stated in the letter of offer; and
2. Meet the minimum entry requirements of the programme which you wish to transfer to.

The Programme Transfer form is obtainable from the Department of Admissions and Credit Evaluation or the Faculty General Office.

The closing date for submission of such applications is typically on the Friday of the second week following the commencement of the trimester for new students.

Successful applicants who wish to accept the programme transfer are required to pay the programme transfer fee (compulsory) and difference in tuition fees (where applicable).

7.6.3.2 Existing students

Students are required to apply for a programme transfer by submitting the Programme Transfer by Existing Students form, certified true copy of your entry qualification and all Notification of Results of all your examination sittings at UTAR. Applications are considered on a case-to-case basis.

The closing date for submission of such applications is typically on the Friday of the second week following the commencement of the trimester for new students.

7.6.4 MQA/Technical unit Exemption/ Credit Transfer

The application for credit transfer is to be made together with the application for admission to the University. Certified true copy of the following documents must be submitted together with the application form:

1. Certificate of Awards
2. Official academic transcripts
3. Programme structure and syllabi
4. Official letter from the Institution of Higher Learning on the status of the programme accreditation from the Malaysian Qualifications Agency (MQA)
5. All relevant information and materials related to your previous studies from SPM/SPMV onwards

<https://admission.utar.edu.my/FAQs.php>

7.6.5 Examination of the University

Exams are scheduled based on the Academic Calendar of the University.

Academic Calendar

First Long Trimester : May / June

Second Short Trimester : October

Third Long Trimester : January

Duration of Long Trimester : **19 – 20 Weeks**

(Teaching Week : 14) (Exam Week : 3) (Semester Break : 2 – 3)

Duration of Short Trimester : **12 Weeks**

(Teaching Week : 7) (Exam Week: 3) (Semester Break : 4)

7.6.6 Quality Point, Grade Point Average (GPA) & Cumulative Grade Point Average (CGPA)

QUALITY POINT:

“The Grade Point earned multiplied by the credits of the course”

GRADE POINT AVERAGE (GPA) - Dividing the sum of all Quality Points earned by the sum of credits of all courses attempted in a trimester, excluding credits of courses which have no contribution to the GPA ”

CUMULATIVE GRADE POINT AVERAGE (CGPA) - Dividing the sum of all Quality Points earned by the sum of credits attempted for all the trimesters, excluding credits of courses which have no contribution to the GPA or CGPA”

HONOURS CLASSIFICATION

For all Undergraduate programmes with effect from January 2011 Intake, honours classification shall be awarded based upon the cut-off CGPA as shown below:

Classification of Honour	CGPA
Honours Degree with Distinction	3.6700-4.0000
Honours Degree with Merit	3.0000-3.6699
Honours Degree	2.0000-2.9999

ACADEMIC HONOURS

Three types of Academic Honours are awarded to students to recognize their academic excellence:

Book Prize	Honours Degree with Distinction or Degree with Distinction (for MBBS Programme)
President's List	GPA $\geq$ 3.8500
Dean's List	GPA $\geq$ 3.6000 $\leq$ 3.8499

Additionally, Academic Improvement List is awarded to students who have improved markedly in their academic performance, i.e. GPA $\geq$ 2.5000 & GPA improvement $\geq$ 1.0000 or elevation of academic standing from probation to normal status

<https://deas.utar.edu.my/Honours-List-Criteria.php>

7.6.7 General Assessment Regulations

RELEASE OF EXAMINATION RESULTS

Results of University Examinations are released after every trimester /semester examination or after every modules of examination. DEAS is to ensure that the release of main examination results at least two (2) days before the commencement of next trimester. Students are required to print out their own Notification of Results (NOR) through the UTAR Portal within the stipulated deadline. Please log on to <http://portal.utar.edu.my> to view and print the NOR.

ACADEMIC STATUS

PROBATION - Occur when the GPA for the trimester is less than 2.0000 (*Exception for the trimester where all courses taken do not contribute towards computation of GPA & CGPA*). Probation period shall end when the candidate has attained a GPA of 2.0000 and above in the following trimester.

TERMINATION – Occur when the GPA is less than 2.0000 for 2 consecutive trimesters and the CGPA for current trimester is less than 2.0000 (*Exception for the trimester where all courses taken do not contribute towards the computation of GPA & CGPA*). Any student whose study has been terminated due to poor academic performance may appeal against termination by submitting the application through UTAR Portal. The result of the appeal shall be made known to the student concerned within two (2) weeks after the deadline of submission.

APPEAL OF REVIEW

Review of marks includes a re-evaluation of answer scripts and re-checking of the marks recorded by the Examiners to ensure there are no mistakes in the addition of marks and no part of an answer submitted by a candidate has been omitted. Any student who is not satisfied with the grades of an examination may appeal for a review by submitting the application through UTAR Portal.

GRADUATION REQUIREMENTS

A candidate is eligible to graduate based on the following:

- Completed and passed all MQA compulsory courses (*applicable for candidates prior October 2013 intakes*) or all MPU compulsory courses (*applicable for candidates from October 2013 Intake onwards*)
- Completed and passed all core and elective courses in the programme
- Achieved a minimum CGPA of 2.0000 within the maximum duration of study
- Accumulated the minimum credits required for the programme of study
- Fulfilled all other requirements stipulated by the University
- Obtained at least Band 3 (before Jan 2023 Intake) or Band 3.5 (from Jan 2023 Intake onwards) for MUET or equivalent (except for students taking Bachelor of Arts (Hons) Chinese Studies Degree Programme)
- However, students (local or **international**) who are taking Bachelor of Medicine and Bachelor of Surgery, Bachelor of Arts (Hons) English Language and Bachelor of Arts (Hons) English Education must pass the MUET with a minimum of Band 4 or equivalent before graduation.

7.7 Info about Academic Advisory System, student survey

7.7.1 Online Academic Advisory System

Students are required to meet with their assigned academic advisors at least once a Trimester.

Academic advisors provide information/ advice on academic programmes, degree requirements, career options, course selection, secondary fields of study and extracurricular activities.

However, students under industrial training are exempted to meet their academic advisors.

Students who do not meet their Academic Advisor are not allowed to register any course for next trimester.

7.7.2 UTAR Student's Online Survey

The students are required to complete the online Student Survey at UTAR Intranet before the end of the trimester. Their comments will be kept strictly confidential. The students' feedback is useful to the lecturers in future trimesters and will help to improve the academic programmes.

7.7.3 Online Course Verification Exercise

Students are required to perform online course verification exercise every trimester to check and verify the course(s) registered within the stipulated deadline. Students are required to click on the **“VERIFY”** button after checking the course(s) registered and if there is no discrepancy in the course(s) registered.

In the case that there is/are discrepancies in the course(s) registered in the system, students are required to enter the discrepancies in the text-box provided and click on the **“PENDING”** button. Faculty General Office will check on the discrepancies after the verification exercise.

It is the responsibility of the students to verify the course(s) registered on the system. If there is no action from the students after the stipulated deadline, the Faculty will assume that the course(s) registered is **CORRECT.**

<https://fict.utar.edu.my/Faculty-Announcement.php>

8.0 Code of Ethics/ Plagiarism / Dress Code (labs, classroom, etc.)

UTAR DRESS CODE FOR STUDENTS

UTAR students shall be decently or appropriately attired while attending Lecture, Tutorial, Examination, Class, Workshop or while involving or attending any activities either inside or outside the campus or while present in any part of the campus.

Students must display their own Student Card at all times on Campus or in such manner on such occasions and at such times as may, from time to time, be directed by the University.

Students who do not dress appropriately or failed to display their own Student Card will be issued a written reminder and the offence will be recorded. Students who breached the University Dress Code and regulations for more than two (2) times shall be referred to the Student Disciplinary Committee for disciplinary actions.

MALE STUDENTS

FEMALE STUDENTS

FOR SPORTS DURING WEEKDAY AFTER 6PM/ WEEKEND ACTIVITIES

(Effective from Mon - Fri 6pm - 11:59pm / Weekend)

(a) A proper sports attire or UTAR dress code can be worn

(b) Students should follow UTAR dress code while attending academic activities (lecture, tutorial, practical, test, library, examination, teaching laboratory)

Issued by: Department of Student Affairs
Date of Updated: August 2022

UTAR DRESS CODE FOR STUDENTS

GENERAL	ACCEPTABLE	NOT ACCEPTABLE
i. No excessively short, tight, or revealing clothes ii. No tattoo and piercing If any tattoos are for religious reasons, please write to the Department of Student Affairs for consideration		
SHIRTS	ACCEPTABLE	NOT ACCEPTABLE
i. No tubes, halter tops. Spaghetti straps and shoulder straps should be at least 2" wide ii. No t-shirts/ shirts with offensive words, terms, logos, pictures, cartoons or slogans iii. Navel, midriff and back should not be exposed		
PANTS, SLACKS, SKIRTS	ACCEPTABLE	NOT ACCEPTABLE
i. No shorts ii. No mini-skirts and no tight skirts iii. Dresses and skirts length should not be shorter than 3 inches above knees iv. Clothing must not be ripped, torn, or contains noticeable holes. Ripped/torn jeans is acceptable but should not reveal the skin v. Pants/ jeans for male and female should be at least 3/4 pant length		
FOOT WEAR	ACCEPTABLE	NOT ACCEPTABLE
i. No flip flops, No Japanese slippers as well as No house slippers		

The University reserves the right to rescind and/or amend the student's dress code at any time.

Issued by: Department of Student Affairs
Date of Updated: August 2022

9.0 Centre for Internet of Things and Big Data (CloTBD)

The Centre for Internet of Things and Big Data (CloTBD) is a research centre to spearhead research and innovation in Internet of Things (IoT) and big data analytics. The objective of the centre is to promote research and development in the areas of IoT, AI & Big Data, and Software Systems for Industry 4.0. This is achieved through a portfolio of R&D projects including strategic long-term research projects, industrial collaborative training programmes, and consultancy. Centre for Internet of Things and Big Data (CloTBD) aims to provide a focal point of contact for management, cooperation and coordination among UTAR staffs and external parties that seek R&D collaboration and consultancy. The goal of this centre is to become a national and regional centre of excellence in the research area of technologies especially in Internet of Things, Artificial Intelligence and Big Data Analytics.

As to achieve the goals, the research areas in CloTBD are divided into four focused research groups. They are **Computer Vision and Machine Learning, Internet of Things and Data Analytics, Software, Systems, and Humans, and Computing in Healthcare.**

COMPUTER VISION AND MACHINE LEARNING

This research group consists of researchers who are focusing on image and video analysis and machine learning. Areas of interest include:

- Machine automation thru machine vision and learning
- Video surveillance
- Vision-based underwater monitoring system
- Vision-based advanced driver assistive systems (ADAS)
- Expert system for suspicious behavior detection
- Fruit ripeness prediction

INTERNET OF THINGS (IoT) AND DATA ANALYTICS

The computer scientists in this research group are focusing on wireless sensor networks, smart home / village / city, precision agriculture, and data analytics for business and finance. These include the following:

- Smart IoT-gateway and sensor nodes,
- Data analytic framework and analytic techniques
- Application of blockchain in healthcare and IoT
- Wireless body and area network

SOFTWARE, SYSTEMS, AND HUMANS

This research group focuses on software engineering, digital economy, information systems, big data, knowledge management, social networks, cyber-security, cyber-psychology, and e-learning. These include the area of interest as follows:

- Global software development trends in Malaysia,
- Maturity model in enterprise business intelligence systems,
- System quality on service oriented business intelligence architecture social cognitive theory
- Feature based detection of malware threat prediction,
- Cyber security behavior

COMPUTING IN HEALTHCARE

The experts in this group focuses on biomedical imaging and healthcare, medical imaging equipment and tools, 3D modeling and printing, and image and signal processing for healthcare. The area of interest includes:

- Predictive algorithm in biomedical imaging and healthcare,
- 3 rendered images for surgical planning
- Design of vein localization and
- Depth estimation in embedded system

The centre organizes technical public seminars regularly throughout the year where researchers from the centre and other universities, or experts from the industry share their knowledge on their research area or technical domain. Students will be able to learn the latest technology and R&D areas by attending these seminars. The centre also organizes the postgraduate colloquium at least once a year where the postgraduate students in the faculty present their latest research work in their respective fields of interest.

Students may be recruited to work on research or development projects embarked on by CIoTBD researchers. Such projects may be offered as final year projects for undergraduate students under the UTAR Undergraduate Research Scheme (UTAR URS), or as post-graduate level research projects leading up to a master or doctoral degree in Computer Science. Depending on the funding nature and status of a particular project, students may be awarded financial assistance if they are engaged under the *student assistantship*, *project research assistantship* and *research scholarship scheme*

<https://ciotbd.research.utar.edu.my>

10.0 Faculty Related Club

Objectives of Societies & Clubs of UTAR in General

- 1) Encourages students to participate in extracurricular activities
- 2) In line with UTAR's vision which emphasizes "To be a global university of educational excellence with transformative societal impact".
 - Promoting awareness in and appreciation of a broad range of interest and activities
 - Developing leadership skills
 - Developing team work
 - Developing discipline and responsibility
 - Providing a platform for students with common interests to network and to enhance their ability and talents
 - UTAR societies and clubs organize a wide range of extra-curricular programs and activities throughout the year
- 3) Student societies and clubs are classified into:
 - Course-based group
 - General Interest group
 - Performing creative group

- Voluntary group
- Recreation, Sports & Games Groups
- Self Defense group

FICT Students can participate in any of the following clubs:

Course-Based Groups

- Accounting Society
- Agricultural and Food Science Society
- Banking and Finance Society
- Biological Science Society
- Built Environment Society
- Business Administration Society
- Chemistry Society
- Chinese Studies Society
- Computer Society
- Engineering Society
- English Language Society

- Entrepreneurship Society
- Financial Economic Society
- Logistics and International Shipping Society
- Logistic and Supply Chain Management Society
- Marketing Society
- Mass Communication Society
- MBOT Student Chapter
- Psychology Society
- Statistical Computing and Operations Research Society
- Dietetics Society

General Interest Groups

- Asian Cultural Society
- Blockchain Club
- Buddhist Society
- Calligraphy Society
- Career Development Club
- Catholic Students Society
- Chinese Language Society

- Christian Fellowship Society
- Crime Prevention Society
- E-Sport and Games Development Society
- Finance and Investment Society
- Indian Cultural and Language Society
- International Friendship Society
- Islamic Students' Society
- Japanese Culture Club
- MathsFun Society
- Nature and Pet Lovers Society
- Yoga Society
- Young Entrepreneurs Society
- Makers Club
- World History Club
- Sustainable Development Society

Performing and Creative Groups

- Arts and Crafts Society
- Dance Club

- Drama and Public Speaking Society
- Film Club
- Music Club
- Photography Society

Voluntary Groups

- Askar Wataniah
- Community Service Society
- First Aid Society

Recreation, Sports & Games Groups

- Board Games Club
- Dodgeball Club
- Sports Club
- Traveler's Den

Self Defense Groups

- Aikido Club
- Hapkido Club
- Karatedo Club

- Muay Thai Club
- Taekwondo Club
- Wushu Club

FICT students are encouraged to join the only course-based society of FICT: Computer Society. The following figure shows the logo of Computer Society.

Aims and Objectives of Computer Society.

- To initiate and maintain fellowship among students in Information and Communication Technology (ICT) programmes.
- To promote interest in ICT among UTAR students.
- To encourage and develop a high standard of proficiency in the field of ICT.
- To provide a platform for interaction with relevant professional bodies and industry.
- To promote UTAR's ICT programmes.

<https://dsa.kpr.utar.edu.my/Clubs--and--Societies-List.php>

11.0 Collaborations with Professional Bodies/ Industry/Universities

11.1 External Collaborations

- **Alibaba** – Professional Training, Curriculum Development, Practical Projects

Remark: UTAR is the first University in ASEAN which signed MoU with Alibaba for their Global E-commerce Talent (GET) programme.

- **Huawei** - Professional Training, Curriculum Development, MoA for Scholarship for UTAR Students, Recruitment etc.
- **Microsoft** - MoU Partnership. Under MoU Microsoft would provide trainings and talks for both students and lecturers, FICT is the member of the Microsoft DreamSpark programme. Under DreamSpark both students and academicians are able to download licensed copy of the Microsoft software.
- **Oracle / Java** - Oracle/Sun Academic Initiative, Software and Curriculum content from Oracle/Sun
- **Alibaba Cloud** - Provide cloud-related professional certifications, curriculum integration, and giving free cloud resources
- **Amazon Web Services (AWS)** – Provide cloud-related professional certifications, curriculum integration, and giving free cloud resources
- **INTEL** – CREST Fund Projects, Training to staff on Multicore Computing, Microprocessor Design, Embedded Systems Sensing, and Curriculum Development.
- **Cisco** – Cisco Local Academy, conduct CCNA training for students and public, Curriculum Development
- **Hilti** – MoU partner, Research & Collaboration projects/activities (E.g. : Hilti – UTAR Innovation Challenge 2013, postgraduate scholarships for Masters and PhDs, guest lecturers, boot camps and IT based creative projects).
- **IBM** - Members Training in the Tivoli suite of software and access to all their software for academic use
- **SAP** - SAP University Alliance Programme, Professional Training.
- **Malaysia Software Testing Board** – Professional Training and Certification, Curriculum Development
- **Revenue Techpark** – Distribution, deployment and maintenance of Electronic Data Capture (EDC) terminals
- **Craft Guru** – Computational Thinking in Digital Economy
- **BizAcademia** – Digital learning and workforce management platform
- **GNEY Software** – Analysis and Design of Information Systems

- **Onnet Consulting** – ERP implementation to local medium-to-large SMEs and enterprises
- **Infusion Information Technology** – Enterprise Resources Planning (ERP) system integration provider specialized in Sage 300 ERP and MonsoonSIM ERP simulation
- **Infomativ** – E-commerce, Logistic, Commodity Trading, E-Security, Profiling by applying IoT, Machine Learning, Business Intelligence, AI
- **Nexplatform** – Provides smart marketing solution to help property developers and agencies to digitalize their customer experience
- **W Tech Marketing** – Web & apps design and development, cloud hosting solution, blockchain solution
- **E Goodeal** – Online Trading System, Digital Voucher and Loyalty Platform, Event Management
- **Arrow Systems** – IR4.0 Automated Food Packaging Solution Provider. Working together to develop IR4.0 solution
- **TNG Digital** – Electronic payment system operator via digital wallet technology
- **Finexus** – Data Processor Services, Digital Money Wallets, Online Payments, Financial Services, and Regulatory Solutions
- **Worldline International** – Merchant services, financial services, mobility & e-Transactional services
- **GlobeOSS** – Discovering network, business and operational data

12.0 Other (Faculty achievements, special projects, etc.)

12.1 Student Achievement Award 2023

No	Name of Award	Award by (Name(s) of the organisation)	The awards consists of certificate, prize (how much), trophy, books & etc	The award ceremony was held on	The award ceremony was held at/in	Names of students	Programme of Study	Title of paper if a paper is presented to win the award
1	Jabil-FICT FYP Competition (First Prize)	UTAR FICT (sponsored by Jabil)	Cash Prize RM600	5th May 2023	N109	Shreevishal a/l N.Rajandhiran	CS	Object Based Segmentation and Analysis Using Deep Learning Algorithm for Cats and Dogs Images
2	Jabil-FICT FYP Competition (Second Prize)	UTAR FICT (sponsored by Jabil)	Cash Prize RM300	5th May 2023	N109	Gan Kian Yu	CS	Video Anomaly Detection with U-Net Temporal Modelling and Contrastive
3	Jabil-FICT FYP Competition (Third Prize)	UTAR FICT (sponsored by Jabil)	Cash Prize RM150	5th May 2023	N109	Nga Jia Jun	CN	Master- controlled Networking for Mobile Robotic Application

4	Jabil-FICT FYP Competition (Third Prize)	UTAR FICT (sponsored by Jabil)	Cash Prize RM150	5th May 2023	N109	Foong Theen Wui	CN	Development of IoT-Based Agriculture Monitoring Framework using Node-RED
5	ViTrox-FICT Innovation Challenge (First Prize)	UTAR FICT (sponsored by ViTrox)	Cash Prize RM1000	8th May 2023	N109	Chong Yiing Sheah	CS	Video Surveillance: Item Monitoring Against Theft
6	ViTrox-FICT Innovation Challenge (Second Prize)	UTAR FICT (sponsored by ViTrox)	Cash Prize RM500	8th May 2023	N109	Tan Kah Hsing	CT	Residence Parcel Drop Box with Multi-Layer Authentication Using Cyber Physical System
7	ViTrox-FICT Innovation Challenge (Third Prize)	UTAR FICT (sponsored by ViTrox)	Cash Prize RM300	8th May 2023	N109	Foong Theen Wui	CN	Development of IoT-Based Agriculture Monitoring Framework using Node-RED
8	ViTrox-FICT Innovation Challenge (Fourth Prize)	UTAR FICT (sponsored by ViTrox)	Cash Prize RM150	8th May 2023	N109	Mok Zhang Jing	CS	Mobile Tour Guide Application with Attraction Recognition for UTAR Grand Hall

9	Grand Prize at the Developer Day Hackathon (Team GPT-0)	Samsung Malaysia Electronics, Taylor's University, UTAR	Samsung Galaxy Z Flip4 each winner	14 to 15 June 2023	REXKL	1) Lee Wei Song 2) Tan Sin Chee 3) Loi Jia Yee	CS CS AT	
10	Second Prize at the Developer Day Hackathon (Team Train Chaser)	Samsung Malaysia Electronics, Taylor's University, UTAR	Samsung Tab S8	14 to 15 June 2023	REXKL	Wooi Zhuang Ru	CS	
11	Third Prize at the Developer Day Hackathon (Team Fold Fusion)	Samsung Malaysia Electronics, Taylor's University, UTAR	Samsung Galaxy Watch5 Pro each winner	14 to 15 June 2023	REXKL	1) Illeladewa Oluwatimilehin Adekunle 2) Chong Siow Yen 3) Choo Jia Zheng 4) Wong Hsin	CS SE SE SE	
12	Champion at the Tech 4 Good Challenge (Well-Being Track)	ViTrox Technologies Sdn Bhd, ViTrox Academy and UTAR	Cash Prize RM3000, medal, certificate of achievement	8-Jul-23	Batu Kawan, Penang	Ng Shi Qi Yeoh Ban Choon Yap Chee Kuang	CS CS CN	
13	First Runner-up at the Tech 4 Good Challenge (Sustainability Track)	ViTrox Technologies Sdn Bhd, ViTrox Academy and UTAR	Cash Prize RM1500, medal, certificate of achievement	8-Jul-23	Batu Kawan, Penang	Oh Jia Sheng Lim Xuan Yvonne Eng Xin Yee	CS	

14	First Runner-up at the Tech 4 Good Challenge (Well-Being Track)	ViTrox Technologies Sdn Bhd, ViTrox Academy and UTAR	Cash Prize RM1500, medal, certificate of achievement	8-Jul-23	Batu Kawan, Penang	Tan Sin Chee Lee Wei Song Daniel Loo Jun Jie	CS	
15	Second Runner-up at the Tech 4 Good Challenge (Agriculture Track)	ViTrox Technologies Sdn Bhd, ViTrox Academy and UTAR	Cash Prize RM1000, medal, certificate of achievement	8-Jul-23	Batu Kawan, Penang	Ho Joe Ee Goh Ken How Soh Wen Kai	CS	
16	First Runner-up at the UTAR-FICT Inaugural Intervarsity Capture-the-Flag Challenge @ The Amazing Cyberhunt	FICT, Hilti Asia IT Services Sdn Bhd, LGMS and iPay88 (M) Sdn Bhd	Medal	22-Jul-23	UTAR Kampar Campus	Tan Sin Chee Lee Wei Song	CS	
17	Second Place at the TuneProtect Hackathon 2023	Google, Asia Pacific University and Innovation (APU)	Cash Prize RM 5000, e-certificates	6 to 8 July 2023	APU	Tan See Moon Kam Min Yi	CS	Project Title: Tune4u
18	First Place at the Alibaba Cloud MY Digital Talent in U Competition	Alibaba Cloud	Cash Prize RM4000, Certificate	28-Aug-23	Alibaba Cloud Malaysia Office	Yong Hong Long	CS	

19	Third Place at the Alibaba Cloud MY Digital Talent in U Competition	Alibaba Cloud	Cash Prize RM1000, Certificate	28-Aug-23	Alibaba Cloud Malaysia Office	Khor Jia Hui	CS	
20	Jabil-FICT FYP Competition (First Prize)	UTAR FICT (sponsored by Jabil)	Cash Prize RM600	20-Sep-23	N109	Peh Hong Bo	CS	DySUN - An Activity-aware Smart IoT Lights
21	Jabil-FICT FYP Competition (Second Prize)	UTAR FICT (sponsored by Jabil)	Cash Prize RM300	20-Sep-23	N109	Wooi Zhuang Ru	CS	Job-Applicant Matchmaking System Using Natural Language Processing
22	Jabil-FICT FYP Competition (Third Prize)	UTAR FICT (sponsored by Jabil)	Cash Prize RM150	20-Sep-23	N109	Bill Hundson David	IA	Web-Based Image-Augmented Reality (AR) Matching Generator
23	Jabil-FICT FYP Competition (Third Prize)	UTAR FICT (sponsored by Jabil)	Cash Prize RM150	20-Sep-23	N109	Lee Chun Hoong (1905878)	CS	Stress Mental Health Symptom Assessment Mobile Application for Young Adults

24	2023 IEEE Industrial Electronics and Applications Conference (Best Paper Award)	IEEE	Certificate	6 to 7 Nov 2023	Hard Rock Hotel, Batu Ferringhi Beach, Penang	Ts Dr Ooi Boon Yaik (staff) Dr Kh'ng Xin Yi (staff) Goh Ken Why (student)	CS	Efficient IoT Data Processing Framework for High Velocity Data to Non-Intrusively Track Machine Operation Status
25	MonsoonSIM Enterprise Resource Management Competition (MERMIC) Malaysia Final 2023 (Champion)	Faculty of Industrial Management of Universiti Malaysia Pahang Al-Sultan Abdullah (UMPSA), in collaboration with Infusion Information Technology Sdn. Bhd.; it was powered by MonsoonSIM, the provider of MonsoonSIM Enterprise Simulation and Gaming Platform	Gold Medal, Cash Prize of RM2000	23-Sep-23	Universiti Malaysia Pahang	Chia Wan Jun (2201613) Goh Song Bing (2202860) Leng Thiam Meng (2103441) Ng Chun Yap (2103468) Kong Chi Chen (2103489)	CN CN IB CN CN	
26	MonsoonSIM Enterprise Resource Management Competition (MERMIC) Malaysia Final	Faculty of Industrial Management of Universiti Malaysia Pahang Al-Sultan Abdullah (UMPSA), in	Gold Medal, Cash Prize of RM1000	23-Sep-23	Universiti Malaysia Pahang	Thang Xian Ya (2103072) Lim Xiao Yun (2102957) Khor Wei Heng (2102095) Heng Wen	DE DE DE CS CS	

	2023 (First Runner-up)	collaboration with Infusion Information Technology Sdn. Bhd.; it was powered by MonsoonSIM, the provider of MonsoonSIM Enterprise Simulation and Gaming Platform				Chong (2102234) Wong Sum Yu (2101680)
